### Chapter 1. Letter to Shareholders

- I. 2022 Operational Report
  - (I) Implementation Results of the Business Plan

The Company's operating revenue for 2022 was NT\$1,159,106, an increase of NT\$307,233 from NT\$851,873 in 2021. The pre-tax net profit in 2022 was NT\$61,015, an increase of NT\$125,414 from NT\$64,399 in 2021.

In 2022, the Company's main products included "memory and application IC", "catering" and IC for medical equipment and hearing aids.

"Memory and application IC" products were mainly sold to Hong Kong and Southeast China. With the relief of the pandemic in 2022, and China's gradually opening of its borders, the operating revenue in 2022 increased by 17.16% compared to the previous year.

The operating revenue from "catering" increased by 42.59% in 2022 compared to the previous year, mainly due to the relief of the pandemic, the opening for eat-in, and the recovery of the customer flow. The gross profit rate was about 47%.

The operating revenue of medical-related products increased by NT\$96,029,000 from the previous year, and the gross profit rate was about 48%.

To sum up, the sales of all the above products increased compared with that in 2021, and the gross profit rate grew to 16.00%.

(II) Research and Development

The Company's main businesses include trading "memory and application IC" products, manufacturing and selling medical equipment and operating "restaurants".

In the sales of "memory and application IC" products, closed management was adopted worldwide due to the COVID-19 pandemic, leading to a rise in remote work such as home office and on-line conferences. At schools, remote teaching was adopted to avoid the risk of cluster infection, promoting the upgrade of cloud network operators and expansion of data center hardware and software equipment. To meet the market demand, in addition to closely tracking the latest updates of product specifications at any time, we also actively contacted manufacturers distributing NAND Flash chips to make storage memories for SSD, so that the Company's products can meet the market needs.

In the manufacturing and sales of "medical equipment", due to the high dependence on 3C products, the average age of people suffering a loss is becoming younger, which means an increasing number of people need to get help with hearing. Therefore, the Company actively upgrades its technology to ensure low distortion degree and sound quality in different environments through improving the signal processing speed and noise reduction function, so as to improve the user's hearing compensation and increase the auditory quality of human voice signal, and improve the wearing comfort and experience. The Company also designed air-guide and bone-guide hearing aids and other products to meet users' different needs and provide the hearing-impaired people a variety of choices.

In the "restaurant" operation, the Company developed new product combinations, selected favorable operation locations, and took increasing operating revenue as the goal of the management.

### II. Overview of 2022 Operating Plan

### (I) Operational Policy

In the aspect of "memory and application IC", the pursuit of highfrequency width and high computing speed in the big data era, the consideration of power saving and durability, and the dispersion and diversity of products are development trends of memory in the future, and in particular, the advent of the 5G era, has pushed the demand for server replacement to a historic high. In addition to servers, memories are also used in electronic products such as digital cameras, voice recorders, mobile phones, digital TVs, game consoles, smart home appliances, and portable power supplies. At present, most of our customers are in the mobile phone and game console industries. In the future, we wish to develop new customers in the fields of high-computing-speed servers and smart home appliances. In the "medical equipment", with the increase in human longevity, people are increasingly dependent on 3C products, and more people need help with hearing. According to the estimation of the World Health Organization, more than 900 million people worldwide will have disabling hearing loss by 2050. In addition, the U.S. Government has officially announced that all major medical device companies and distributors could sell OTC hearing aids from 2020. The clear market opportunity will bring a demand explosion for hearing aids.

In the customer source of "catering", except for further developing the Greater Taipei Area and expanding consuming groups, the Company is also expanding outside the city to open new restaurants in places with higher consumption ability and more customers to increase the operating revenue. In terms of products, in addition to satisfying consumers' tastes and providing customized products, we also strive to unify the taste of fine snacks, so that consumers can enjoy the same delicious snacks in different stores. We also provide frozen-cooked food for people to enjoy the skills of chefs at home.

In conclusion, the Company takes continuing to expand the customer bases for its products as well as the range and depth of the product application as its sales policy.

(II) Important production and marketing policy

Sign long-term supply agreements with upstream suppliers to ensure the stability of raw material sources.

Keep close contact with existing customers and grasp the customers' consumption trend so as to provide the most needed products.

Pay close attention to the trend of overseas market, and accurately grasp the link between the local government's implementation plan and the Company's product development, so as to effectively obtain first-hand business opportunities.

### III. Future development strategy

Continue to expand and promote the healthy development of product revenue structure, integrate the data to analyze customer needs, connect upstream and downstream to drive the supply chain management, and innovate business models to provide customers with higher value-added services.

IV. Impact of the external competitive environment, the legal environment, and the overall operating environment

In the second half of 2022, the control on borders were gradually loosened and the domestic market for people's livelihood were released. However, the Company will face an increased risk of price-cutting competition in 2023 due to multiple challenges such as continued global inflation and pressure from interest-rate hike pressure, the ongoing Ukraine-Russia war, the economic slowdown in China, the renewed US-China technology dispute and the increasing impact of climate change. Facing import/export and consumption restrictions imposed by the local government or environment, the Company can only retain existing customers and attract new customers by increasing the diversification of products, launching new products, implementing on-line platforms and strengthening aftersales services.

Chairman: Cheng, Yuan-Ching Manager: Liu, Yi-Chang Chief Accounting Officer: Peng, Dong-Feng

### Chapter 2. Company Profile

- I. Date of Incorporation: December 6, 1993
- II. Company History
  - 1993 Chip Hope Co., Ltd. was established, with a paid-in capital of NT\$ 5,000,000.
    - Acting as the agent of Hualon Microelectronics Company, it sold consuming IC and PC IC products of the Hualon.
  - Acting as the agent of ELAN Microelectronics Corp., it sold 4bit micro-controllers, communication IC products and PC IC products.
    - Conducted a capital increase in cash of NT\$3,000,000, and the paid-in capital increased to NT\$8,000,000.
  - 1999 Its annual performance reached NT\$ 500,000,000 for the first time.
    - Purchased the office building at Jen-ai Road, Taipei City.
    - Conducted a capital increase in cash of NT\$30,000,000, and the paid-in capital increased to NT\$38,000,000.
    - Developed wireless phones of 45MHZ, 48/46MHZ, 49MHZ, 900MHZ and 2.4GHZ as well as the IC of caller ID TYPEI.
  - 2000 Conducted a capital increase in cash of NT\$112,000,000, and the paid-in capital increased to NT\$150,000,000.
    - Organized R&D personnel to research and develop mobile phone chargers.
    - The Company was honored as Excellent Export and Import Factory by the Economics Department, ranking 74th in export growth rate (123%).
  - 2001 · Invested in Hong Kong Joint Harvest Industries Limited.
    - Developed 27MHZ, 400MHZ, 900MHZ and 2.4GHZ RF modules.
  - 2002 Conducted a capital increase in cash of NT\$20,000,000 and transferred NT\$40,000,000 of surplus to capital, and the paid-in capital increased to NT\$210,000,000.
    - Developed PDA software and hardware platform, translator IC and dual-mode software decoder software.
  - 2003 · Invested in Shenzhen Chip Hope Micro-Electronics Ltd. in Mainland China
    - Purchased a new office at Liancheng Road, Zhonghe District, New Taipei City, and moved into the office in April of the same year.
    - Registered its shares as emerging stock in the Securities

Counter Trading Center in March.

- Applied to list in the Securities Counter Trading Center in June.
- Being approved to list in the Securities Counter Trading Center in September.
- Transferred surplus to capital, and the paid-in capital increased to NT\$250,000,000 in October.

2004 · Listed in the Securities Counter Trading Center on March 8.

- Initially issued domestic unsecured convertible corporate bonds of NT\$150,000,000 in August.
- Established the Photoelectric Business Group and the Memory Business Group in August.
- Increased the capital of its subsidiary Joint Harvest Industries Limited by NT\$21,772,000 in December.
- 2005 · Passed ISO9001: 2000 certification in July.
  - Supplied LED flash lens to Sonyericsson.
  - Mass production and sales of flash memory card (including SD, CF, mini and micro series products).
  - Transferred surplus to capital, and the paid-in capital increased to NT\$294,492,000 in September.
  - Increased the capital of its subsidiary Joint Harvest Industries Limited by NT\$21,058,000 in December.

2006 • Implemented treasury stock in April.

- Transferred surplus to capital, and the paid-in capital increased to NT\$321,908,000 in September.
- Signed distribution contract with Japanese distributor ELECOM CO., LTD. in December.
- 2007 Shenzhen Chip Hope Micro-Electronics Ltd. and Spreadtrum Communications (Shanghai) Co., Ltd. signed GSM/GPRS Technical Cooperation Agreement in May.
  - Conducted a capital increase in cash of NT\$70,000,000, and the paid-in capital increased to NT\$404,004,000 in September.

2008 • In January, the mainland subsidiary independently designed and developed mobile phone products, and assisted customers in mass production.

- Received the order of optical and LED electronic ODM from a New York design company to supply the table lamp of different styles for Modern Art Museum, New York in March.
- Became a preferred supplier of solar energy and LED speed limit signs for the Australian government and schools in May, and the products were shipped to Sydney schools for installation in June.
- Signed an NDA with an American mobile phone chip factory, and started the research and development of Android system for smartphone in May.
- Implemented treasury stock in July.

- Completed the street lamp trial installation program in Quebec, Canada, and became a qualified supplier in July.
- Completed the trial installation for the India street lamp advertising cooperation project in August.
- Completed the prototype of smart phone M2 in November.
- Completed the lighting project of the shopping mall parking lot in Poland in December.
- 2009 Received an order of optical and LED electronic ODM working table lamps from an American office furniture design company in February.
  - Enhanced the design and function of the smartphone M3 in February, and conducted trial production at the end of May.
  - Completed the installation of the LED light beam project of YMCA Building in Singapore in March.
  - Completed the installation of the LED light box for Standard Chartered Bank Singapore in May.
  - Received the order for the design and development of Japanese Citizen LED LENS and HOLDER in August.
  - Increased the capital of its subsidiary Joint Harvest Industries Limited by NT\$79,991,000 in September.
  - Began mass production of Android mobile phone A60 in December.
- 2010 Publicly offered shares of the Company are all converted to uncertificated shares in June.
  - Began mass production of Windows mobile phones using the Hysse K3 platform in June.
  - Disposed of equipment assets and patent authorization of Photoelectric Division in August.
  - Increased the capital of its subsidiary Joint Harvest Industries Limited by NT\$61,508,000 in September.
  - Began the mass production of the K300 phone in October.
  - Started to develop dual 3G Android mobile phones in November.
  - Signed platform authorization with InfoMax and started the development of ultra-low-price Android mobile phones in December.
- 2011 Began to develop Android flagship models on the Qualcomm platform in February.
  - Trial production of A80 dual 3G Android mobile phones in April.
  - Trial production of A410 Android flagship models on the Qualcomm platform in May.
  - Completed the development and integration of prototype data encryption mobile phone and encrypted microSD cards in June.
  - Established SkySafe encryption product brand in October.
  - Began mass production of K600 Dual SIM Dual Standby Android mobile phone in October.

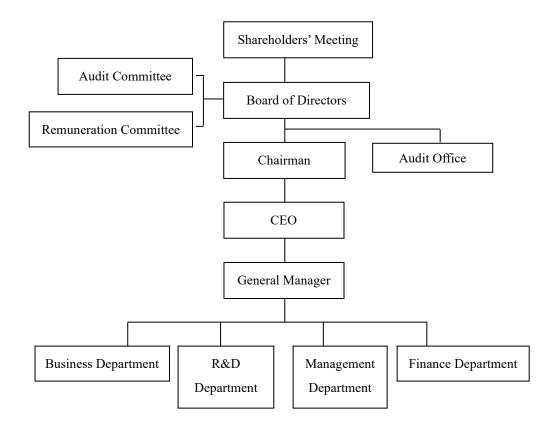

- Held SkySafe media presentation in November.
- 2012 Held SkySafe Hong Kong dealer establishment media presentation in February.
  - Introduced MTK Android platform development plan in February.
  - Increased new solar energy business in March.
  - Signed A80S purchase contract with Taiwan channel customer in July.
  - Signed D1 mobile phone development contract with European customers in August.
  - Signed an NFC mobile phone customized contract with Chinese customers in the industry in October.
- 2013 Introduced laser processing, research and development, and carried out R&D of the micro-machining process for the application of photoelectric glass and 3C product materials in March.
  - Began to sell traffic recorders in April.
  - Completed laser cutting research and development of ultra-thin glass in June.
  - Completed the first phase of laser cutting research and development for Corning Gorilla Glass in July.
  - Began to develop the optical filter BG IRCF in October.
  - Successfully developed the laser cutting of the optical filter IRCF in December.
  - Being ranked among the "Deloitte Technology Fast 500 Asia Pacific" in 2013
  - Conducted private placement of 135,000,000 ordinary shares.
- 2014 Established the joint venture Honglang Technology to develop high-toughened glasses laser cutting machine in July.
- 2015 Conducted private placement of convertible bonds of NT\$250 million in February.
  - Invested to set up Huichu Investment Co., Ltd. to invest in the leisure industry in February.
  - Completed the development of the high-toughened glass laser machine in March.
  - Started to produce the fingerprint identification cover glass in October.
  - Started to produce the fingerprint identification module in December.
- 2016 Started to develop plasma products in November.
- 2017 Invested and established Jufeng Hotel to enter the general hotel industry in March.
  - Invested NT\$252,000,000 to Jipin Seafood Restaurant in October.
  - · Increased the capital of its affiliated enterprise Lungshan

Company by NT\$ 52,500,000 in December.

- 2018 Increased the capital by NT\$70,263,000 through the private placement of convertible corporate bonds in January.
  - Increased the capital by NT\$61,316,000 through private placement of convertible corporate bonds in March.
  - Trading of shoe machine AI automation equipment in April.
- 2019 Purchased 11% equity of Jipin Seafood in March.
- 2020 Ended the liquidation of Jufeng Hotel in May.
  - Disposed of 19.71% equity of the affiliated enterprise Longshan Company in September.
  - Increased the capital by NT\$24,197,000 through private placement of convertible corporate bonds in November.
  - Opened "Jipin Boutique" in December.
- 2021 Started medical devices sales business in March.
- 2022 · Opened "Jipin Zhubei" in January.
  - Disposed of 29.57% equity of the affiliated enterprise Longshan Company in March.
  - Obtained 0.52% equity of Intelligo company in May.
  - Disposed of 100.00% equity of Huichu Company in September.
- 2023 Disposed of 61.00% equity of the subsidiary Honglang Company in March.

50% of the directors are concurrently an employee of the Company, and 50% of the directors are independent directors. The Company focuses on gender equality on the Board of directors, and female directors account for 50% of the total number of directors.

Independence of the Board of Directors:

The Company has established a director election system, and the procedures for election of all directors are open and fair, and comply with the provisions of the Company's Articles of Incorporation, Procedures for Election of Directors, Regulations Governing Appointment of Independent Directors and Compliance Matters for Public Companies and Article 14-2 of the Securities and Exchange Act, etc. The Board of Directors is composed of 3 independent directors (50%) and 3 non-independent directors (50%). Two of the directors are within the second degree of kinship or a chairman concurrently holding the position of CEO. It plans to elect one more independent director in the 2023 annual general shareholders' meeting to improve its independence.

#### Range of Remuneration

Note 1: The names of directors shall be listed separately (for corporate shareholders, their names and the names of their representatives separately shall be listed respectively), and the general directors and independent directors shall be listed separately to disclose the payment amounts in a summary manner. If a director concurrently serves as the General Manager or Deputy General Manager, fill in this form and the remuneration of the General Manager and Deputy General Manager shall be disclosed.

and Deputy General Manager shall be disclosed.
 Note 2: The remuneration for the director in the most recent fiscal year (including salary, position allowances, severance pay, various bonuses, incentive payments, etc.).

Note 3: Indicates the directors' remuneration approved by the Board of Directors in the most recent fiscal year.

Note 4: The director's relevant business execution expenses (including travel expenses, special expenses, various allowances, dormitories, cars and other physical provisions, etc.) in the most recent fiscal year. If houses, cars and other means of transport or exclusive personal expenses are provided, the nature and cost of the assets provided, as well as the actual or fair market rent, fuel and other payments shall be disclosed. If a driver is

- provided, please note relevant fees paid by the Company to the driver, but not included in the remuneration. Note 5: The salary, position allowances, severance pay, various bonuses, incentive payments, travel expenses, special
- Note 5: The salary, position allowances, severance pay, various bonuses, incentive payments, travel expenses, special expenses, various allowances, dormitories, cars and other physical provisions paid to the director concurrently serves as an employee (including general manager, deputy general manager, other managers and employees) in the most recent fiscal year. If houses, cars and other means of transport or exclusive personal expenses are provided, the nature and cost of the assets provided, as well as the actual or fair market rent, fuel and other payments shall be disclosed. If a driver is provided, please note relevant fees paid by the Company to the driver, but not included in the remuneration. In addition, salary expenses recognized under IFRS 2 "Share-based Payments", including the acquisition of stock option certificates, restricted stock warrants, new shares with limited rights of employees and participation in cash increase subscription shares, shall also be included in the remuneration.
- Note 6: If a director who concurrently served as an employee (including the general manager, deputy general manager, other managers and employees) and received employee remuneration (including stock and cash) in the most recent fiscal year, the employee remuneration amount approved by the Board of Directors in the most recent fiscal year. If it is impossible to estimate, the proposed allocation amount of this year shall be calculated according to the proportion of the actual allocation amount of last year. In addition, Schedule I (III) (the name of the manager who allocates the employee bonus and the allocation status) shall be filled.
- Note 7: The total amount of remuneration paid to the directors of the Company by all companies (including the Company) in the consolidated report shall be disclosed.
- Note 8: The total amount of remuneration paid to each director and the name of the director shall be disclosed in the corresponding range.
- Note 9: The total amount of remuneration paid to each director of the Company by all companies (including the Company) in the consolidated report shall be disclosed, and the name of the director shall be disclosed in the corresponding range.
- Note 10: Net after-tax profit refers to the net after-tax profit of an individual or individual financial report in the most recent fiscal year.

Note 11:

- a. Renumeration from reinvestment businesses other than subsidiaries or from the parent company received by the Company's directors shall be filled in this column (In no such director, please fill in "None").
- b. If the Company's director receives compensation from reinvestment businesses other than subsidiaries or from the parent company, such remuneration received by the director shall be added to Column I of the Range of Remuneration, and the column shall be changed as Parent Company and All Reinvestment Businesses.
- c. Remuneration refers to the compensation, reward (including the reward paid to employees, directors and supervisors), business execution expenses and other relevant remuneration received by the directors of the Company as directors, supervisors or managers of the subsidiaries or parent companies.
- \* The remuneration disclosed in this table is different from the concept of income in the Income Tax Law, so this table is for information disclosure only, not for tax purposes.

#### Renumeration to supervisors: None. (II)

### (III) Remuneration to the General Manager and Deputy General Managers

Note 1:The names of the general manager and deputy general managers shall be listed separately, and amounts of payments shall be disclosed in a summary manner. If a director concurrently serves as the General Manager or Deputy General Manager, fill in this form and the previous form, or Tables (I) and (II).

Note 2: Fill in the salary position allowances, and severance pay of the General Manager and Deputy General Manager in the most recent fiscal year.

Note 3: Fill in the various bonuses, incentive payments, travel expenses, special expenses, various allowances, dormitories, cars and other physical provisions and compensation paid to the general manager or deputy general manager in the most recent fiscal year. If houses, cars and other means of transport or exclusive personal expenses are provided, the nature and cost of the assets provided, as well as the actual or fair market rent, fuel and other payments shall be disclosed. If a driver is provided, please note relevant fees paid by the Company to the driver, but not included in the remuneration. In addition, salary expenses recognized under IFRS 2 "Share-based Payments", including the acquisition of stock option certificates, restricted stock

warrants, new shares with limited rights of employees and participation in cash increase subscription shares, shall also be included in the remuneration.

- Note 4:Fill in the amount of employee compensation (including stock and cash) approved by the Board of Directors in the most recent fiscal year. If it is impossible to estimate, the proposed amount of this year shall be calculated according to the proportion of the actual allocation amount of last year. In addition, Schedule I (III) shall be filled.
- Note 5: The total amount of remunerations paid to the general manager and deputy general manager of the Company by all companies (including the Company) in the consolidated report shall be disclosed.
- Note 6: The total amount of remunerations paid to each general manager and deputy general manager by the Company, and the name of the general manager and deputy general manager shall be disclosed in the corresponding range.
- Note 7:The total amount of remunerations paid to each general manager and deputy general manager of the Company by all companies (including the Company) in the consolidated report shall be disclosed and the name of the general manager and deputy general manager be disclosed in the corresponding range.
- Note 8:Net after-tax profit refers to the net after-tax profit of an individual or individual financial report in the most recent fiscal year.
- Note 9:
  - a. Renumeration received by the general manager and deputy general manager of the Company from reinvestment businesses other than subsidiaries or from the parent company shall be filled in this column. (If none, please fill in "none").
  - b. If the Company's general manager or deputy general manager receives compensation from reinvestment businesses other than subsidiaries or from the parent company, such remuneration received by the general manager or deputy general manager shall be added to Column I of the Range of Remuneration, and the column shall be changed as Parent Company and All Reinvestment Businesses.
  - c. Remuneration refers to the compensation, reward (including the reward paid to employees, directors and supervisors), business execution expenses and other relevant remuneration received by the general manager or deputy general manager of the Company as directors, supervisors or managers of the subsidiaries or parent companies.
  - \* The remuneration disclosed in this table is different from the concept of income in the Income Tax Law, so this table is for information disclosure only, not for tax purposes.
- (IV) Name of the Manager Receiving Employee Compensation and Allocation Status: None.
- (V) Separate Comparisons and Descriptions of Total Remuneration, as a Percentage of Net Income Stated in the Parent Company-Only Financial Reports or Individual Financial Reports, as Paid by the Company and All Other Companies Included in the Consolidated Financial Statements During the Past Two Fiscal Years to Directors, Supervisors, the General Manager, and Deputy General Managers, with Analysis and Description of Remuneration Policies, Standards, and Packages, Procedure for Determining Remuneration, and Linkage Thereof to Operating Performance and Future Risk Exposure.
  - 1. Total remuneration, as a percentage of net income stated in the parent company-only financial reports or individual financial reports, as paid by the Company and all other companies included in the consolidated financial statements during the past two fiscal years to directors, supervisors, the general manager, and deputy general managers.

2. The policies, standards, and portfolios for the payment of remuneration, the procedures for determining remuneration, and the correlation with risks and business performance.

The Company pays remunerations to the directors and supervisors according to the provisions of the Articles of Incorporation, Remuneration Payment Methods for Directors and Functional Committees, and the Managers' Retirement Scheme. If any profit is made, the amount appropriated as the directors' compensation shall not exceed 2%. In addition to salaries and allowances based on academic experience and years of service, the remunerations paid to the general manager and deputy general managers shall also take into consideration the industrial standards and their contributions, so as to motivate employees and retain talents.

In addition, the Company has insured the directors, supervisors and employees against operation and management risks.

- IV. Implementation of Corporate Governance
  - (I) Board of Directors

| A total of six (A) meetings of the 12th Board of Directors were held in 2022. |
|---|
| The attendance of directors and supervisors was as follows:                   |

Other matters:

- I. With regard to the operations of the Board of Directors, if any of the following circumstances occur, the dates, terms of the meetings, contents of motions, all independent directors' opinions, and the Company's response shall be specified: None. Please see Pages 31-32 for details.
  - (I) Matters referred to in Article 14-3 of the Securities and Exchange Act.
  - (II) Any recorded or written Board resolutions to which independent directors have dissenting or qualified opinions to be noted in addition to the above.
- II. Regarding recusals of directors due to conflicts of interests: None.
- III. TWSE/TPEx-listed companies shall disclose the evaluation cycle and duration, the scope of evaluation, methodology, and evaluation contents of the self (peer) evaluation of the Board of Directors and fill out Table II (2) Implementation of the Evaluation of the Board of Directors. (Please refer to the following table for details)
- IV. Objectives for strengthening the functions of the Board of Directors in the current year and the most recent fiscal year: To implement the spirit of corporate governance and strengthen relevant functions of the Board of Directors, the Company established the Audit Committee in 2021 and the Compensation Committee in 2011 to assist the Board of directors in fulfilling their duties and remuneration management functions. Please refer to the Corporate Governance Implementation Status and Deviations from the Corporate Governance Best-Practice Principles for TWSE/TPEx Listed Companies for the implementation status.

VI. Other important information to facilitate a better understanding of the Company's practices on ethical corporate management: The Company does not establish ethical corporate management principles.

Note: Whether "Yes" or "No" is ticked, it should be stated in the column of summary.

- (VII) If the Company Has Established Corporate Governance Principles, Please Disclose the Inquiry Method: The Company does not establish corporate governance principles.
- (VIII) Other Important Information Regarding Corporate Governance:

Operation Procedures for Handling of Major Internal Information The Company has established the "Management Measures for Preventing Insider Trading". The responsible unit will deal with major information immediately, notify relevant colleagues and supervisors from time to time, remind them whether there is any major information that needs to be disclosed according to law, and inform them of relevant regulations. In addition, to ensure that colleagues, managers and directors are aware of and follow the relevant regulations, the Company also provides training for Company executives and colleagues.

# (IX) Implementation of the Internal Control System1. Statement on Internal Control

#### Chip Hope Co., Ltd. Statement on Internal Control Date: March 10, 2023

I. The Company hereby states the results of the self-evaluation of the internal control system for 2022 as follows:

- II. The Company acknowledges that the establishment, implementation, and maintenance of an internal control system is the responsibility of the Board of Directors and managerial officers, and the Company has established an internal control system. The internal control system is designed to provide reasonable assurance for the effectiveness and efficiency of the operations (including profitability, performance, and protection of assets), reliability, timeliness, and transparency of reporting, and compliance with applicable laws and regulations.
- III. The internal control system has innate limitations. No matter how robust and effective the internal control system is, it can only provide reasonable assurance of the achievement of the foregoing three goals; in addition, the effectiveness of the internal control system may vary due to changes in the environment and conditions. However, the internal control system of the Company has self-monitoring mechanisms in place, and the Company will take corrective action against any defects identified.
- IV. The Company uses the assessment items specified in the Regulations Governing Establishment of Internal Control Systems by Public Companies (hereinafter referred to as the "Regulations") to determine whether the design and implementation of the internal control system are effective. Based on the process of control, the assessment items specified in the Regulations divide the internal control system into five constituent elements:
  1. control environment; 2. risk assessment; 3. control activities; 4. information and communication; and 5. monitoring. Each constituent element includes a certain number of items. For more information on such items, refer to the Regulations.
- V. The Company has adopted the aforesaid assessment items for the internal control system to determine whether the design and implementation of the internal control system are effective.
- VI. Based on the results of the determination in the preceding paragraph, the Company is of the opinion that, as of December 31, 2022, the internal control system (including the supervision and management of subsidiaries), including the design and implementation of the internal control system relating to the effectiveness and efficiency of the operations, reliability, timeliness, and transparency of reporting, and compliance with applicable laws and regulations, are effective and can reasonably assure the achievement of the foregoing goals.
- VII. This statement will constitute the main content of the Company's annual report and the prospectus and will be disclosed to the public. Any falsehood or concealment with regard to the above contents will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Act.
- VIII. This statement was approved by the Board of Directors on March 10, 2023, and out of the six directors in attendance, none had dissenting opinions of it and all approved the content expressed in this statement.

Chip Hope Co., Ltd.

Chairman: Cheng, Yuan-Ching

General Manager: Liu, Yi-Chang

- 2. Has a CPA been hired to audit the Internal Control System: No CPA has been hired to audit the Internal Control System in 2022.
- (X) For Penalties Imposed Upon the Company and Its Employees in Accordance with the Law or Penalties Imposed by the Company Upon Its Employees for the Violation of the Internal Control System Policy During the Most Recent Fiscal Year up to the Date of Publication of the Annual Report, if the Result of Such Penalties May Have a Significant Impact on the Shareholders' Equity or the Price of Securities, the Contents of the Penalties, Principal Deficiencies, and Improvements Shall Be Specified: None.
- (XI) Major Resolutions of Shareholders' Meeting and Board Meetings During the Most Recent Fiscal Year up to the Date of Publication of the Annual Report:

Unit: NT\$; April 20, 2023

Note 1: List the highest and lowest market prices of each year. And calculating each year's average market price based upon each year's actual transaction prices and volume.

Note 2: Please refer to the number of shares issued at the end of the year and allocated in accordance with the resolution of the Board of Directors or the Shareholders' Meeting in the next year.

Note 3: Earnings per share before and after adjustment should be listed in case of retroactive adjustment due to stock dividends.

- Note 4: If the conditions for the issuance of equity securities stipulate that the dividends not paid in the current year can be accumulated to be paid in the year with a surplus, the dividends not paid shall be disclosed separately as of the current year.
- Note 5: Price/Earnings Ratio = Average closing price of the current year/Earnings per share.
- Note 6: Price/Dividend ratio = Average closing price of the current year/Cash dividends per share.

Note 7: Cash dividend yield = Cash dividend per share / Average closing price per share of the current year.

Note 8: Net worth per share and earnings per share shall be included in the latest quarter as of the publication date of the annual report which has been checked (reviewed) by accountants; the remaining fields should contain information for the year ending on the publication date of the annual report.

#### (VI) Dividend Policy and Implementation Status

1. Dividend policy established in the Company's Articles of Incorporation

The Company is in the business growth stage, and the dividend policy gives priority to the Company's future development and financial position while taking into account the reasonable remuneration of shareholders. The current dividend policy is mainly to cover losses of previous years first. If there is a surplus, the balance plus the accumulated undistributed surplus of previous years shall be distributed after the Board of Directors has prepared a distribution proposal and submitted it to the Shareholders' Meeting for resolution.

- 2. Distribution of Dividends Proposed in the Shareholders' Meeting:
  - (1) The Company's Board of Directors resolved on March 29, 2023 not to distribute dividends.
  - It is planned to discuss it at the Annual Shareholders' Meeting on May 30, 2023.
- (VII) Effect upon Business Performance and Earnings per Share of Any Stock Dividend Distribution Proposed or Adopted at the Most Recent Shareholders' Meeting: N/A.
- (VIII) Compensation of Employees, Directors, and Supervisors
  - 1. The percentages or ranges with respect to employee, director, and supervisor compensation, as set forth in the Company's Articles of Incorporation If the Company has any profit in the year, it shall set aside 5% to 10% for the compensation of employees and not more than 2% for the compensation of directors. However, if the Company still has accumulated losses, it shall be covered first.
  - 2. The Basis for Estimating the Amount of Employee, Director, and Supervisor Compensation, for Calculating the Number of Shares to Be Distributed as Employee Compensation, and the Accounting Treatment of the Discrepancy, if Any, Between the Actual Distributed Amount and the Estimated Figure, for the Current Period: Not distributed.
  - 3. Distribution of Compensation Approved in the Board of Directors Meeting: Not distributed.
  - 4. Compensation of Employees, Directors, and Supervisors in the Previous Fiscal Year: Not distributed.
- (IX) Share Repurchases: None.
- II. Corporate Bonds: None.
- III. Preferred Shares: None.
- IV. Global Depository Shares: None.
- V. Employee Stock Options: None.
- VI. New Restricted Employee Shares: None.
- VII. Issuance of New Shares in Connection with Mergers or Acquisitions or with Acquisitions of Shares of Other Companies: None.
- VIII. Implementation of the Company's Capital Allocation Plan: None.

# Chapter 5. Operational Highlights

- I. Business Activities
  - (I) Business Scope
    - 1. Principal Business Activities

Manufacturing, processing, designing and trading of electronic component materials, finished products, semiconductors, communication equipment, mechanical equipment, electrical equipment, general instruments and equipment, other optical and precision instruments, medical equipment, measuring instruments, computer equipment and software, catering and intelligent manufacturing.

2. Proportion of Business

| Major Product   | Operating revenue in 2022<br>(NT\$ 1,000) | Proportion of revenue<br>(%) |
|-----------------|---|------------------------------|
| Memory Products | 703,074                                   | 60.66                        |
| Catering        | 291,610                                   | 25.16                        |
| Bio-medical     | 123,465                                   | 10.65                        |
| Others          | 40,957                                    | 3.53                         |
| Total           | 1,159,106                                 | 100.00                       |

- 3. Current items of goods (services)
  - (1) Memory Products: Sales of flash memory cards, memory IC and wafers.
  - (2) Bio-medical: AI hearing aids.
  - (3) Catering: Jipin Seafood Restaurant.
  - (4) Others: Agency of Elan Communication and computer peripheral IC.
- 4. New products to be developed
  - (1) R&D and sales of AI aids.
  - (2) Application and development of intelligent manufacturing technology.
  - (3) Develop new restaurant sites.
- (II) Industry Overview
  - 1. Current Status and Development
    - (1) Memory Industry
      - In 2022, affected by the overall economic adverse factors, the global memory market suffered from a contraction of terminal demand. However, under the recession of the economy, to improve its product technology to increase competitive advantages is the current goal of the factory, and the most important goal is the next generation of computing. The development of DRAM focuses on DDR6 and other specifications. In addition to achieving thinner linewidth through the EUV process to increase the transistor density, it achieves higher transmission speed through the mSAP packaging technology. However, 3D NAND Flash technology introduces EUV technology into the process and the product stack number is increased

to over 200 layers, so as to achieve high-speed and high-reliability SSD access devices. The new memory can be integrated with the logic IC through the yellow light process to improve the data transmission performance and reduce the size of the chip. Therefore, the emerging memory technology integrating RRAM, MRAM and wafer process will be an important development direction in the future.

(2) Bio-medical application industry:

At present, the Company has developed hearing aid products with noise reduction functions, and with the continuous progress of artificial intelligence, future hearing aid products will be optimized. In addition, the U.S. Government has officially announced that all major medical device companies and distributors could sell OTC hearing aids from 2020. The clear market opportunity will bring a demand explosion for hearing aids.

(3) Catering Industry

The past two years' pandemic is unforgettable for the global catering industry. For Taiwan, people's livelihood demand began to release in the second half of 2022. In addition, the border control was gradually loosened, which was also conducive to the recovery of overall consumption growth and the rise of the operating revenue of the restaurant industry.

2. Relationship Amongst Upstream, Midstream, and Downstream Sections of the Industry

| Upstream  | Midstream                         | Downstream                              |
|---|-----------------------------------|---|
| Flash memory manufacturer                         | Controller chip                   | Flash memory card                       |
| Distributor                                       | manufacturer                      | manufacturer                            |
| PCB manufacturer                                  |                                   | <ul> <li>Electronic products</li> </ul> |
| <ul> <li>Electronic parts manufacturer</li> </ul> |                                   | manufacturer                            |
| (2) The industry architecture of bio-             | -medical industry:                |   |
| I In atus a us                                    | Midatusaus                        | Deserventure                            |
| Upstream  | Midstream                         | Downstream                              |
| Raw material manufacturer, IC                     | Midstream           • ODM factory | Downstream     Brand owner              |
| *   |                                   |   |
| Raw material manufacturer, IC                     | ODM factory                       | Brand owner                             |
| Raw material manufacturer, IC manufacturer        | ODM factory                       | Brand owner                             |

(1) The industry architecture of memory products:

3. Product Development Trends and Competition

transportation industry, catering

industry, Retail industry, and leisure and recreation industry

The Company's main businesses include memory products, bio-medical products and catering industries. The development trend of various products is as follows:

(1) Memory Products

At present, Samsung, Kioxia, Western Digital, Micron, SK Hynix, Intel, etc. are the main producers of NAND Flash wafers in the world. Under the fierce

consumers

competition of the 3D NAND stacking process, the increase of the 3D NAND stack number has led to technical bottleneck of the single-string stack. Samsung has led the NAND Flash industry since 2002, mastering the discourse power of market order.

In the past two years, impacted by the pandemic, the NAND Flash market was oversupplied. However, with the increasing demand for SSDS over 2TB, 512Gb and 1Tb NAND chips became the most popular applications. As the demand for memory for data centers and servers increases, the demand for mainstream specifications including R-DIMM 32/64GB and SSD for servers also increases. It is estimated that DRAM and NAND Flash will continue to increase in price and volume in this field.

(2) Bio-medical application

With the increase in human longevity, people are increasingly dependent on 3C products, and more people need help with hearing. The appearance of OTC (OVER THE COUNTER) hearing aids should be the biggest change in the industry. The core technology of OTC hearing aids continues to advance, and it is cheaper and more convenient than traditional hearing aid fitting. With the continuous progress and optimization of artificial intelligence, the future of hearing aids will be promising, and the industry will continue to burst with vitality.

- (3) Catering Industry
  - A. Catering service: To provide customers with a series of thoughtful meticulous and innovative catering services.
  - B. Development of frozen food: To allow consumers to cook at home, many catering companies have launched popular frozen products with unique features. For example, "Jipin Seafood" has developed frozen and refrigerated foods, including salted egg yolk custard bun, oxtail stew with red wine and brined beef tendon, so that consumers can enjoy delicious meals at home and the Company can seize the business opportunities of pandemic prevention.
- (III) Technology and R&D Overview
  - 1. Annual R&D Expenses in the Most Recent Fiscal Year The Company did not invest in research and development.
  - 2. Technology or Product Successfully Developed
    - (1) Control IC of different caller ID telephones
    - (2) Application of 900MHz and 2.4GHz RF modules in cordless telephones
    - (3) 2.4GHz spread-spectrum cordless telephone (Spread-spectrum Technology)
    - (4) Multi-functional clocks for LCD Lines and body scale
    - (5) Flashlight lens for traffic signs and camera phone
    - (6) Memory card and adapter manufacturing
    - (7) Fingerprint sensor
    - (8) 100-watt high-power LED street lamp products
    - (9) 1 to 30-watt high-power LED street lamp products
    - (10) High-power LED optical module/cooling structure

- (11) High-power LED light controller and drive circuit module
- (12) CMOS/CCD rear camera module
- (13) Sunroof controller
- (14) Car door anti-clamp module
- (15) General mobile phone communication IC module
- (16) Touch control mobile phone communication IC module
- (17) Android-encrypted cell phone
- (18) Windows Mobile phone
- (19) Driving recorder
- (20) Optical filter IRCF laser cut
- (21) Application of the plasma technology in the cleaning process
- (22) Feedback cancellation, big data recording, noise reduction and environmental detection technology
- (IV) Long- and Short-Term Business Development Plans
  - 1. Short-term plan
    - (1) Utilizing its years of experience in semiconductor marketing and application design, the Company will understand the niche of semiconductor industry and its downstream development trend, continue to strengthen the professional fields of operation and development team, analyze the industry trends, and strengthen its market positioning to obtain greater advantages for the Company's operation.
    - Develop Jipin frozen, refrigerated food and exquisite meals to provide (2) consumers with take-away options, and strengthens cooperation with delivery platforms to provide consumers with more delivery services.
  - 2. Long-term plan
    - (1)Continue to introduce outstanding talents and strengthen personnel training to lead in the industry.
    - Continue to carry out the development plan with cooperative manufacturers (2)to enhance product price competitiveness. Establish brands to stabilize sales channels and prices through brand growth.
    - (3) Plan the hearing aid products with the customer and market as orientation, and effectively reduce the signal noise of the hearing aid to reduce the noise so that consumers can improve their speech recognition ability and auditory comfort.
    - (4) Expand Jipin Seafood's specialty frozen food to meet the future "stay-athome economy", and allows consumers to taste delicious food at home.
- II. Analysis of the Market as well as Production and Marketing Situation
  - Market Analysis **(I)** 
    - 1. Sales (Service) Regions of Main Products (Services)

|        |           | Unit: N1\$ 1,000 |  |  |  |

2. Market share

At present, the Company's main businesses include sales of memory and biomedical products and catering industries. The memory products integrate development technologies and the Company belongs to a second-tier manufacturer in terms of business and sales, so the market share of each product line in different fields is still low. Biomedical products are mainly sold to the Chinese mainland market, and are still in their early stage. In the aspect of the catering industry, due to the fierce market competition of Taiwan's tourism and leisure industry, the brand marketing of the Company is still insufficient, and the market share is still low.

- 3. Future Market Supply, Demand, and Growth Potential
  - (1) Memory Industry

Since the Company is mainly engaged in the field of consuming memory storage, which is mainly used in 3C products and portable hard drives made in Mainland China. We can only estimate the competition situation in this market roughly, and its market demand situation is roughly measured by the growth forecast of the mobile phone market this year.

A. Supply Side

At present, Samsung, Kioxia, Western Digital, Micron, SK Hynix, Intel, etc. are the main producers of NAND Flash wafers in the world. Under the fierce competition of the 3D NAND stacking process, the increase of the 3D NAND stack number has led to technical bottleneck of the single-string stack. Samsung has led the NAND Flash industry since 2002, mastering the discourse power of market order. With the increasing demand for SSDS over 2TB, 512Gb and 1Tb NAND chips became the most popular applications.

B. Demand Side

As the demand for NAND FLASH products declined, all factories were still destocking, and the market was oversupplied, so both the price and sales of memory products fell. However, due to the shortage of relevant parts, the cost of SSDs and other related products increases, resulting in the price rise of high-capacity SSDs. In addition, since virtual currency drives the mining trend, the demand for high-capacity SSDs is surging.

- (2) Research and Development of AI Hearing Aids
  - A. Supply Side

The global hearing aid market is dominated by six brands, namely Sonova Hearing Group, Denmark William Demant Group, Denmark GN ReSound Hearing Group, Denmark Widnex Hearing Aids, American Starkey Hearing Aids and Siemens Hearing Group, accounting for over 95% of the market share. Since these six brands are multinational enterprises, their distribution services in Taiwan mostly rely on hearing centers or agency companies.

B. Demand Side

Globally, about two-thirds of people over the age of 70 have hearing problems. However, the use of hearing aids is less than a tenth of the real

market demand. Hearing loss is listed in many countries as a major chronic disease that seriously affects the life quality of the elderly. Therefore, it is urgent to support and develop the hearing aids market for the elderly. The core technology of OTC hearing aids continues to advance, and it is cheaper and more convenient than traditional hearing aid fitting, bringing more convenience for consumers.

(3) Catering Industry

We have developed dishes that are highly accepted by local people based on authentic Hong Kong-style Cantonese cuisine cooked by a 40-year experienced chef combined with local taste. The landscape and layout of the restaurants take the landscape and buildings as the outline, connecting the spaces of different blocks and increasing the depth of field level, so as to provide a new space for consumers to enjoy delicious food in Jhubei.

4. Competitive Niches

Memory and IC Design Industry:

Based on its existing design experience, the Company will establish a position of a professional IDH company in the market of mainland China, and continue to deepen the old channels with relatively good quality to sell memory cards and 3C peripheral products. It will also be engaged in the R&D and design of medical devices through the semiconductor field. In the hearing aid project, the Company takes researching and developing OTC hearing aids that can be sold by major medical stores and retail channels.

- 5. Favorable and Unfavorable Factors of Development Prospects and Countermeasures
  - (1) Favorable Factors:
    - A. The Company has been engaged in semiconductor-related fields for years, and has technical talents and relevant channels to provide appropriate products and services according to customer needs. Through the semiconductor field, the Company also started researching and developing AI hearing aids products.
    - B. In the catering industry, the Company has over 14 years of operating experience and has always adhered to traditional Cantonese cuisine, which is very popular among consumers.
  - (2) Unfavorable factors:

Due to the ongoing Russia-Ukraine war, and soaring global inflation, there is a decline in the demand for terminal consumer electronic products and a longer destocking time, increasing the risk of price loss and price competition.

- (3) Countermeasures
  - A. Relying on its years of experience in semiconductor marketing and application design, the Company will continue to strengthen the professionalism of the management team, analyze the industrial trends, continue to strengthen the manufacturer and customer development plan, strengthen the competitiveness of products, integrate multiple technologies, and improve the intelligent manufacturing capability to

obtain greater advantages for the company's operation.

- B. The Company will strengthen delivery and take-out services, develop frozen food of its own features to maintain existing stable customers and introduce preferential and delicate special deals and packages to provide multiple services to cope with the pandemic.
- (II) Functions and Manufacturing Processes for Main Products
  - 1. Important Functions of Main Products

| Major Product                  | Important Functions                                    |  |  |
|--------------------------------|--|--|--|
|                                | Mainly used for storage media in mobile phones,        |  |  |
|                                | computers, tablets, driving recorders, household       |  |  |
|                                | intelligent appliances and other electronic products.  |  |  |
| <b>Bio-medical Application</b> | Hearing aids products                                  |  |  |
| Catering                       | Providing meal services for daily dining or gathering. |  |  |

- 2. Manufacturing Process: Not applicable, since no production or manufacturing is involved.
- (III) Supply of Major Raw Materials

Elan Electronics is the main supplier of the Company's IC application commodities. It provides IC matrices to the Company and has cooperated with the Company for a long time for its stable product quality, high production capacity, and active cooperation.

Most of the memory products are standardized products, since there are a large number of suppliers, who have cooperated with the Company for a long time, so there is no risk of supply shortage.

The Company's main IC supplier for hearing aids products is British Cayman Islands Intelligo Technology Inc. Taiwan Branch. The quality of its products is stable, but due to the tight production capacity of upstream chip factories, the delivery time is long.

- (IV) Major Clients Who Have Accounted for at Least 10% of the Total Sales in Any of the Last Two Years, Their Sales Amount and Proportion, and Reasons for Increase or Decrease
  - 1. Major Suppliers Who Have Accounted for at Least 10% of the Total Purchases in Any of the Last Two Years

Unit: NT\$ 1,000

|              | Below Senior High School | 3.85  | 8.19  | 6.92                                |

## IV. Environmental Protection Expenditure

Any losses suffered by the Company in the most recent fiscal year and during the current fiscal year up to the publication date of the annual report due to environmental pollution incidents (including any compensation paid and any violations of environmental protection laws or regulations found in the environmental inspection, the disposition dates, disposition reference numbers, the articles of law violated, the contents of law violated, and the content of the dispositions), and an estimate of possible expenses that could be incurred currently and in the future and countermeasures being or to be taken shall be disclosed. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided:

There have been no pollution accidents in the most recent fiscal year and during the current fiscal year up to the publication date of the annual report.

## V. Labor Relations

- Employee Benefit Plans, Continuing Education, Training, and Retirement Systems and the Status of Their Implementation, and the Status of Labor-management Agreements and Measures for Safeguarding Employees' Rights and Interests.
  - 1. Employee Welfare
    - (1) Annual and festival bonus
    - (2) Annual employee travel
    - (3) Employee internal and external education and training
    - (4) Staff gathering
  - 2. Continuing Education and Training: The Company handles various internal and external training for employees according to work requirements.

Unit: NT\$ 1,000

## 3. Retirement System and Its Implementation

The Company has a retirement policy, which allocates 2% of the total salary to the Central Trust Bureau special account as the labor pension reserve funds. The retirement measures and pension payment standards are the same as the provisions of the Labor Standard Law. From July 1, 2005, the Company has made a contribution of 6% of the employees' salary every month to a special personal pension account for employees according to the Labor Retirement Pension System.

4. Agreements between Labor and Management and Employee Rights Protection Measures: The labor and management relation is good, without significant agreement matters.

| Item                                       | Description  |
|--|--|
| Access control security                    | <ol> <li>A 24-hour access control monitoring system is provided.</li> <li>Security companies are contracted to provide security services at nights and on holidays.</li> </ol>         |
| Equipment<br>maintenance and<br>inspection | The Management Committee regularly and irregularly inspects elevators, fire equipment and safety equipment in public areas.  |
| Physiological<br>hygiene                   | Regularly clean and disinfect the office areas.  |
| Insurance                                  | <ol> <li>Insure labor insurance and health insurance according to law.</li> <li>Consult an insurance company to insure a business accident<br/>insurance of NT\$ 2 million.</li> </ol> |

(II) Any losses incurred as a result of labor disputes in the most recent fiscal year, and during the current fiscal year up to the publication date of the annual report (including any violations of the Labor Standards Act found in labor inspection, the disposition dates, reference numbers, the articles of law violated, the contents of law violated, and the content of the dispositions), and an estimate of possible expenses that could be incurred currently and in the future and countermeasures being or to be taken shall be disclosed. If a reasonable estimate cannot be made, an explanation shall be provided:

The Company has a good labor and management relations. So far, there have been no labor and management disputes.

- VI. Information Security Management
  - (I) Describe the information security risk management structure, information security policy, specific management scheme, resources invested in the information security management, and information security policy
    - 1. Information security risk management structure The Company strengthens its information security management to ensure the confidentiality, integrity and availability of its information assets to provide an information environment for the normal operation of its business.
    - 2. Information security risk management structure
      - (1) The Company's Management Department is responsible for coordinating matters related to information security management.
      - (2) The employees shall comply with the Company's information or confidential security specifications.
      - (3) The employees' job positions should be properly isolated and only be given access to information necessary for the job.
      - (4) When there is an information security incident, the information security contact personnel shall be notified immediately.
      - (5) In case of damage to the rights and interests caused by an information security incident, it shall be appropriately and effectively disposed of.
    - 3. Specific management scheme, resources invested in information security management, and information security policy
      - (1) Access to the control and management system.
      - (2) Set up a firewall, install anti-virus software, set access rights, and encrypt data.
      - (3) Regularly sweep company computer equipment and network equipment every month.
  - (II) Any losses incurred as a result of major information security incidents, the possible impact and the response measures during the current fiscal year up to the publication date of the annual report. If a reasonable estimate cannot be made, an explanation shall be provided: None.

## VII. Important Contracts

The parties, main contents, restriction clauses and commencement dates of sales and purchase contracts, technical cooperation contracts, engineering contracts, long-term loan contracts and other important contracts affecting shareholders' rights and interests that are still in force as of the publication date of the annual report and expire in the current fiscal year:

| Type of Contract | Counterparty               | Contract Period       | Major Contents   | Restrictions |  |
|------------------|----------------------------|-----------------------|------------------|--------------|--|
| Short-term loan  | Taiwan Cooperative<br>Bank | 2022.06.01-2023.01.03 | Credit financing | None         |  |

Condensed Balance Sheet

Note 1: The year not audited and certified by the CPAs shall be indicated.

Note 2: If the assets have been reappraised in the current year, the date and amount of the appraisal shall be listed.

Note 3: As of the date of publication of the annual report, a company listed or whose shares have been traded at the places of business of securities firms should disclose the most recent financial information which has been audited and certified or reviewed by the CPAs.

Note 4: The amount after distribution should be filled in accordance with the resolution of the Board of Directors or the Shareholders' Meeting in the next year.

Note 5: If the financial information is subject to self-correction or recompilation as notified by the competent authority, it shall be presented in the corrected or recompiled amount, and the date of self-correction or recompilation and reasons thereof should be indicated.

Note 1: The year not audited and certified by the CPAs shall be indicated.

Note 2: If the assets have been reappraised in the current year, the date and amount of the appraisal shall be listed.

Note 3: As of the date of publication of the annual report, a company listed or whose shares have been traded at the places of business of securities firms should disclose the most recent financial information which has been audited and certified or reviewed by the CPAs.

Note 4: The amount after distribution should be filled in accordance with the resolution of the Board of Directors or the Shareholders' Meeting in the next year.

Note 5: If the financial information is subject to self-correction or recompilation as notified by the competent authority, it shall be presented in the corrected or recompiled amount, and the date of self-correction or recompilation and reasons thereof should be indicated.

Reasons for differences in financial ratios in the most recent two years:

1. Current ratio: Mainly due to the disposal of real estate to repay short-term loans, resulting in a decline in current liabilities.

2. Quick ratio: Mainly due to the disposal of real estate to repay short-term loans, resulting in a decline in current liabilities.

3. Interest earned ratio: Mainly due to the disposal of real estate and equity increased the disposition interest, which greatly increased the pre-tax net profit compared with that in 2021.

4. Payables turnover: Mainly due to the extension of payment terms.

5. Financial ratios of profitability: Mainly due to the disposal of real estate and equity increased the disposition interest, which greatly increased the pre-tax net profit compared with that in 2021.

6. Cash flow adequacy ratio: Mainly due to the increase of capital expenditure in 2022, such as the expansion and decoration of Jipin Seafood.

Note 1: As of the publication date, the CPAs have not completed the review of the Q1 2023 financial information.

Note 2: Earnings per share are calculated based on the weighted average number of shares issued during the year.

Note 3: Since the cash flows from operating activities are outflows and do not conform to the definition of cash flow analysis, this ratio is not applicable.

Individual Financial Analyses

Reasons for differences in financial ratios in the most recent two years:

1. Ratio of long-term capital to property, plant and equipment: Mainly due to the disposal of assets in 2022, resulting in the reduction of real estate and factory buildings.

2. Current and Quick ratio (%) Mainly due to the disposal of real estate to repay short-term loans, resulting in a decline in current liabilities.

3. Interest earned ratio: Mainly due to the disposal of real estate and equity increased the disposition interest, which greatly increased the pre-tax net profit compared with that in 2021.

4. Payables turnover: Mainly due to the extension of payment terms.

5. Financial ratios of profitability: Mainly due to the disposal of real estate and equity increased the disposition interest, which greatly increased the pre-tax net profit compared with that in 2021.

Note 1: Earnings per share are calculated based on the weighted average number of shares issued during the year.

Note 2: Since the cash flows from operating activities are outflows and do not conform to the definition of cash flow analysis, this ratio is not applicable.

The formulas for financial analysis are listed as follows:

- 1. Financial structure
- (1) Debt ratio = Total liabilities/Total assets.
- (2) Ratio of long-term funds to property, plant, and equipment = (Total equity Non-current liabilities)/Net property, plant, and equipment.
- 2. Solvency
- (1) Current ratio = Current assets/Current liabilities.
- (2) Quick ratio = (Current assets Inventory Prepaid expenses)/Current liabilities.
- (3) Interest earned ratio = Earnings before interest and taxes/Interest expenses.
- 3. Operating performance
- (1) Accounts receivable turnover rate (including accounts receivable and bills receivable from business activities) = Net sales/Balance of average accounts receivable in each period (including accounts receivable and bills receivable from business activities).
- (2) Average collection period = 365/Accounts receivable turnover.
- (3) Inventory turnover rate= Cost of sales/Average inventory.
- (4) Payables turnover rate (including accounts payable and bills payable from business activities) = Cost of sales/Balance of average accounts payable in each period (including accounts payable and bills payable from business activities).
- (5) Average days in sales = 365/Inventory turnover.
- (6) Property, plant and equipment turnover rate = Net sales/Average net property, plant, and equipment.
- (7) Total asset turnover rate = Net sales/Average total assets.
- 4. Profitability
  - (1) Asset return ratio = [Profit or loss after tax + Interest expenses × (1 Tax rate)]/Average total assets.
  - (2) Return on shareholders' equity = Profit or loss after tax/Average total equity.
  - (3) Profit ratio = Profit or loss after tax/Net sales.
  - (4) Earnings per share = (Income attributable to shareholders of parent company -Preferred shares dividends)/Weighted average number of shares issued.
- 5. Cash Flow
- (1) Cash flow ratio = Net cash flows from operations/Current liabilities.
- (2) Cash flow adequacy ratio = Net cash flow from operating activities for the most recent five years/(Capital expenditures + Inventory increment + Cash dividends) for the most recent five years.
- (3) Cash reinvestment ratio = (Net cash flow from operating activities Cash dividends)/(Gross property, plant, and equipment + Long-term investment + Other non-current assets + Working capital).
- 6. Leverage
- (1) Operating leverage = (Net operating revenue Variable operating costs and expenses)/Operating income.
- (2) Financial leverage = Operating income/(Operating income Interest expenses).

# Audit Committee's Report

The Board of Directors prepared and submitted the Company's 2022 Business Report, Financial Statements, and a loss compensation proposal. Among them, the Financial Statements have been audited by Wan, Yi-Tung and Chang, Chien-Ling, CPAs at RSM Taiwan, by whom an audit report has been issued. The above-mentioned business report, financial statements and the deficit compensation proposal have been reviewed by the Audit Committee and no discrepancy is found. The report is in accordance with Article 14-4 of the Securities and Exchange Act and Article 219 of the Company Act, and we hereby submit this report.

Chip Hope Co., Ltd.

Convener of the Audit Committee : Tsai Ching-Feng

IV. Financial Statements for the Most Recent Fiscal Year

The financial statements for the most recent fiscal year include the CPA Audit Report, comparative balance sheets for two years, consolidated income statement, statement of changes in equity, cash flow statement and notes or schedules: Please refer to Pages 72 to 145 for details.

- V. Parent Company-Only Financial Statements for the Most Recent Fiscal Year, Certified by the CPA: Please refer to Pages 146 to 208 for details.
- VI. In the Most Recent Fiscal Year and Up to the Date of Publication of the Annual Report, Any Financial Difficulties Experienced by the Company or Its Affiliates and How Said Difficulties Will Affect the Company's Financial Situation: None.

#### Declaration of Consolidation of Financial Statements of Affiliates

For the year of 2022 (from January 1 to December 31, 2022), the Company's entities that are required to be included in the consolidated financial statements of affiliated enterprises under the "Criteria Governing Preparation of Consolidated Business Report of Affiliated Enterprises, Consolidated Financial Statements of Affiliated Enterprises, and Affiliation Reports" are the same as those required to be included in the parent-subsidiary consolidated financial statements under the International Financial Reporting Standards 10. Moreover, the related information required to be disclosed for the consolidated financial statements of affiliated enterprises has been fully disclosed in the aforementioned parent-subsidiary consolidated financial statements. Consequently, a separate set of consolidated financial statements of affiliated enterprises is not prepared.

Sincerely,

Company Name: Chip Hope Co., Ltd.

Person in charge: Cheng, Yuan-Ching

Independent Auditors' Report

Chip Hope Co., Ltd.,

#### Audit Opinion

We have audited the accompanying consolidated financial statements of Chip Hope Co., Ltd. (the "Company") and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated balance sheets as of December 31, 2022 and 2021, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the "consolidated financial statements").

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022 and 2021, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

# **Basis for Opinion**

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company and its subsidiaries in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the Group for the year ended December 31, 2022. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matters identified in the audit of the consolidated financial statements of the Group for the year ended December 31, 2022 are as follows:

#### Allowance for doubtful accounts receivable

The accounting policies with respect to accounts receivable are discussed in Note 4(12) financial instruments to the consolidated financial statements. For details, please refer to Note 6(2) notes receivable, accounts receivable, other receivables, and overdue receivables to the consolidated

financial statements.

Description of key audit matters:

As of December 31, 2022, the accounts receivable of the Group amounted to NT\$233,176,000, accounting for 20% of the total assets in the consolidated financial statements. The estimated impairment of the accounts receivable of the Group relates to the judgment that the amounts may not be recovered. The management, in accordance with International Financial Reporting Standards (IFRS) 9, recognized the loss on allowance for accounts receivable based on expected credit loss from continuing operations. The above estimation involves the management's subjective judgment and credit risk assumptions. Therefore, the estimated impairment of accounts receivable from the Group is included as one of the key audit matters for the year.

The audit procedures are summarized as follows:

We tested and assessed whether management's policy on the allowance for doubtful accounts receivable was reasonable; we tested the aging of accounts receivable balances and verified whether management's allowance for doubtful accounts was correct; and we assessed the post-period recovery of accounts receivable to see if the allowance for doubtful accounts was adequate.

#### Revenue recognition

The accounting policies with respect to revenue recognition are discussed in Note 4(13) revenue recognition to the consolidated financial statements. For details, please refer to Note 6(18) operating income to the consolidated financial statements.

Description of key audit matters:

Revenue is recognized under individual sales contracts when control of the merchandise is transferred. Because the Group enters into different trading terms with individual customers, whether to identify the transfer of control of merchandise based on the trading terms of individual sales targets and recognize revenue accordingly has a significant impact on the financial statements' reliability. As a result, it is listed as a key audit matter.

The audit procedures are summarized as follows:

We sought to understand the accounting policies adopted by the Group for revenue recognition and compared them with the terms of sales to assess whether the policies adopted were appropriate; we sampled internal controls and individual revenue transactions related to revenue recognition and verified relevant customer orders, shipping certificates, and collection documents; and we sampled sales transactions before and after the reporting date and reviewed relevant documents to assess whether the revenue recognition periods were appropriate.

# **Other Matters**

We have also audited the parent company only financial statements of the Company as of and for the years ended December 31, 2022 and 2021, on which we have issued an unqualified opinion.

# Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial

statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is also responsible for assessing the ability of the Company and its subsidiaries to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the financial reporting process of the Group.

# Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error. Misstatements are considered material if individual or aggregate amount of misstatements could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the auditing standards of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We have also performed the following tasks:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We provided the governance units with a statement assuring the personnel of our accounting firm who are subject to independent regulations had acted according to the Norm of Professional Ethics for Certified Public Accountant of the Republic of China to remain neutral and also communicated with them about all relations and other matters (including related preventive measures) that could affect the independence of certified public accountants.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2022, and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

# <u>Chip Hope Co., Ltd. and Subsidiaries</u> <u>Notes to Consolidated Financial Statements</u> For the Years of 2022 and 2021

(In Thousands of New Taiwan Dollars)

(Unless Stated Otherwise)

# I. <u>Company History</u>

Chip Hope Co., Ltd. (the Company) was established and commenced operations on December 6, 1993. The Company and its subsidiaries (the "Consolidated Company") are engaged in the manufacture, design and trading of electronic component materials, finished products, semiconductors, communications equipment, machinery and equipment, electrical equipment, general instrumentation, other optical and precision instruments, medical equipment, metrology and measuring instruments, computer equipment and software, and catering business. The Company's shares started to be traded on the Taipei Exchange on March 8, 2004.

These consolidated financial statements are presented in the New Taiwan dollar, the Company's functional currency.

- II. <u>Date of Authorization for Issuance of the Financial Statements and Procedures for Authorization</u> The Consolidated Financial Statements have been approved by the Board of Directors on March 29, 2023.
- III. Application of New and Amended Standards and Interpretations
  - (I) <u>The newly issued and amended International Financial Reporting Standards (IFRS)</u> endorsed by the Financial Supervisory Commission ("FSC") have been adopted.

The following table presents the newly issued, amended and revised content and interpretations of the IFRS approved by the FSC for the year of 2022:

| New/Revised/Amended Standards and Interpretations                                       | Effective Date of<br>International<br>Accounting Standards<br>Board (IASB) Release |  |  |  |  |
|---|--|--|--|--|--|
| Amendments to IFRS 3 "Reference to the Conceptual<br>Framework"                         | January 1, 2022  |  |  |  |  |
| Amendments to IAS 16 "Property, Plant, and Equipment -<br>Proceeds before Intended Use" | January 1, 2022  |  |  |  |  |
| Amendments to IAS 37 "Onerous Contracts - Cost of Fulfilling<br>a Contract"             | January 1, 2022  |  |  |  |  |
| Annual Improvements to 2018-2020 Cycle  | January 1, 2022  |  |  |  |  |
| The Consolidated Company has assessed that the above standards and interpretations have |  |  |  |  |  |

no material impact on the Consolidated Company's financial position and financial performance.

#### (II) The newly issued and amended IFRS endorsed by the FSC have not yet been adopted.

The following table presents the newly issued, amended and revised content and interpretations of the IFRS approved by the FSC for the year of 2023:

|   | Effective Date of    |
|---|----------------------|
|   | International        |
|   | Accounting Standards |
| New/Revised/Amended Standards and Interpretations   | Board (IASB) Release |
| Amendments to IAS 1 "Disclosure of Accounting Policies"   | January 1, 2023      |
| Amendments to IAS 8 "Definition of Accounting Estimates"  | January 1, 2023      |
| Amendments to IAS 12 "Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction" | January 1, 2023      |

The Consolidated Company has assessed that the above standards and interpretations have no material impact on the Consolidated Company's financial position and financial performance.

#### (III) Effect of IFRS issued by the IASB but not yet endorsed by the FSC

The following table presents the newly issued, amended and revised standards and interpretations of IFRS that have been issued by the IASB but not yet incorporated into IFRS that are endorsed by the FSC:

|  | Effective Date of        |
|--|--------------------------|
|  | International            |
|  | Accounting Standards     |
| New/Revised/Amended Standards and Interpretations                        | Board (IASB) Release     |
| Amendments to IFRS 10 and IAS 28 "Sale or Contribution of                | To be decided by the     |
| Assets between an Investor and Its Affiliated Enterprise or              | IASB                     |
| Joint Venture"   |                          |
| Amendments to IFRS 16 "Lease Liability in a Sale and                     | January 1, 2024          |
| Leaseback"   |                          |
| IFRS 17 "Insurance Contracts"  | January 1, 2023          |
| Amendments to IFRS 17 "Insurance Contracts"                              | January 1, 2023          |
| Amendments to IFRS 17 "First-time Adoption of IFRS 17 and                | January 1, 2023          |
| IFRS 9" - Comparative Information  |                          |
| Amendments to IAS 1 "Classify Liabilities as Current or Non-<br>current" | January 1, 2024          |
| Amendments to IAS 1 "Non-current Liabilities with Covenants"             | January 1, 2024          |
| The Consolidated Company has assessed that the above standards           | and interpretations have |

The Consolidated Company has assessed that the above standards and interpretations have no material impact on the Consolidated Company's financial position and financial performance.

#### IV. Summary of Significant Accounting Policies

(I) <u>Compliance declaration</u>

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC.

# (II) <u>Preparation basis</u>

The Consolidated Financial Statements have been prepared on a historical cost basis, except for financial instruments measured at fair value.

The fair value measurement is classified into three levels based on the observability and importance of related input:

- 1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities on the measurement date.
- 2. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. deduced from prices).
- 3. Level 3 inputs are unobservable inputs for the asset or liability.

#### (III) Standards for assets and liabilities classified as current and non-current

Current assets include:

- 1. Assets held primarily for trading purposes;
- 2. Assets expected to be realized within 12 months after the balance sheet date; and
- 3. Cash or cash equivalents (excluding assets restricted from being exchanged or used to settle a liability for at least 12 months after the balance sheet date).

Current liabilities include:

- 1. Liabilities held primarily for trading purposes;
- 2. liabilities due for settlement within 12 months of the balance sheet date (current liabilities even if long-term refinancing or rescheduling agreements are completed after the balance sheet date and prior to the adoption of the published financial statements), and
- 3. Liabilities with a repayment schedule that cannot be unconditionally deferred till at least 12 months after the publication of the balance sheet. The terms of the liabilities may be settled by the issuance of equity instruments at the option of the counter-parties, but this does not affect the classification.

All other assets or liabilities that are not specified above are classified as non-current.

#### (IV) Basis of consolidation

The Consolidated Financial Statements include the financial statements of the Company and entities controlled by the Company (subsidiaries). Consolidated Statements of Comprehensive Income includes the operating profit or loss of the acquired or disposed company for the period from the date of acquisition or up to the date of disposal. The financial statements of the subsidiaries have been adjusted to bring their accounting policies in line with those used by the Group. All intergroup transactions, balances, income and expenses are eliminated in full upon consolidation. A subsidiary's total comprehensive income is attributed to the owners of the Company and non-controlling interests, even if non-controlling interests become having deficit balances in the process.

When a change in the Consolidated Company's ownership interests in a subsidiary does not cause it to lose control of the subsidiary, it shall be accounted for as an equity transaction. The carrying amounts of the consolidated and non-controlling interests have been adjusted to reflect the changes in their relative interests in subsidiaries. The difference between the adjustment amount of the non-controlling interest and the fair value of the consideration paid or received is recognized directly in equity and is attributed to the Company's owners..

Please refer to Note 6 (6) and Table 6 and 7 for details, shareholding ratio, and operations of subsidiaries.

#### (V) Foreign currencies

In the preparation of each individual financial statements, transactions denominated in a currency other than the entity's functional currency (i.e. foreign currency) are translated into the entity's functional currency by using the exchange rate at the date of the transaction before they are recorded by each entity.

Monetary items denominated in foreign currencies are translated at the closing rates on the balance sheet date. Exchange differences arising on the settlement or on translating of monetary items are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are translated at the exchange rates prevailing at the date when the fair value was determined. The resulting exchange difference is recognized in profit or loss, except for items whose changes in fair value are recognized in other comprehensive income, where the resulting exchange difference is recognized in other comprehensive income.

Non-monetary items measured at historical cost that are denominated in foreign currencies are translated at the rates of exchange prevailing on the transaction dates and are not retranslated. In the preparation of the consolidated financial statements, the assets and liabilities of foreign operations (including subsidiaries, affiliated enterprises, joint ventures, or branches that operate in a country or currency different from the Company) are translated into the New Taiwan dollar at the closing rate of exchange prevailing on the balance sheet date. Income and expenses are translated at the average rate of the year. The exchange differences arising are recognized in other comprehensive income.

If the Consolidated Company disposes of all the equity of the foreign operations, or disposes of part of the equity of the foreign operations' subsidiary but loses control, or disposes of the foreign operations' joint agreement or the retained equity after the affiliated enterprises is a financial asset and is treated in accordance with the accounting policy of the financial instrument, all accumulated exchange differences attributable to the Company's owners and associated with the foreign operations will be reclassified to profit or loss.

If the partial disposal of a foreign operating subsidiary does not result in a loss of control, the cumulative exchange difference is re-attributed to the non-controlling interest of the subsidiary on a pro rata basis and is not recognized in profit or loss. In the case of any other partial disposal of foreign operations, the accumulated exchange differences are reclassified to profit or loss in proportion to the disposal.

(VI) Inventories

Inventories include merchandise, raw materials, supplies, finished goods and semi-finished goods. Inventory costs are calculated using the weighted average method. Inventories are measured at the lower of cost and net realizable value. The comparison between costs and net realizable values is based on individual items except for the same type of inventory. The net realizable value is the estimated selling price in the ordinary course of business less the estimated costs to be invested to completion and the estimated costs to complete the sale. Cost of inventory is calculated using the weighted-average method.

# (VII) Investment in affiliated enterprises

An affiliated enterprise is an enterprise over which the Consolidated Company has significant influence, but which is not a subsidiary or a joint venture interest.

The Consolidated Company applies the equity method to its investment in affiliated enterprises.

Under the equity method, the investment in affiliated enterprises is initially recognized at cost. The carrying amount of investment is adjusted thereafter for the post-acquisition changes in the Consolidated Company's share of profit or loss and other comprehensive income and profit distribution of the affiliates.

Any excess of the cost of acquisition over the Consolidated Company's share of the net fair value of the identifiable assets, and liabilities of affiliated enterprises recognized at the date of acquisition is recognized as goodwill, which is included in the carrying amount of the investment and may not be amortized. Any excess of the Consolidated Company's share of the net fair value of the identifiable assets and liabilities of affiliated enterprises over the cost of acquisition is recognized as profit or loss in the current year.

If the Consolidated Company does not subscribe for new shares of an affiliate enterprise in proportion to its shareholding, resulting in a change in its shareholding and increase or decrease in the net equity of the investment, the increase or decrease is adjusted to capital reserves - changes in the net equity of the affiliate enterprise recognized under the equity method and the investment accounted for under the equity method. However, if the ownership interest in an affiliate enterprise is reduced as a result of subscription or acquisition without proportionate shareholding, the amount recognized in other comprehensive income or loss related to the affiliate enterprise is reclassified in proportion to the reduction on the same basis as that required for the direct disposal of the related assets or liabilities of the affiliate enterprise. If the former adjustment is charged to capital reserve and the balance of capital reserve generated from the investment using the equity method is insufficient, the difference is charged to retained earnings.

When the Consolidated Company's share of losses of an affiliated enterprise equals or exceeds its interest in that affiliated enterprise (including any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Consolidated Company's net investment in the affiliated enterprise), the Consolidated Company shall discontinue to recognize losses. The Consolidated Company recognizes additional losses and liabilities only to the extent that legal obligations, constructive obligations or payments on behalf of affiliated enterprises have been incurred.

In assessing the impairment, the Consolidated Company considers the overall carrying amount of the investment (including goodwill) as a single asset to compare the recoverable amount with the carrying amount for the purpose of impairment testing, and the recognized impairment loss is part of the carrying amount of the investment. Any reversal of impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

When the Company ceases to adopt the equity method from the date it ceases to invest in the affiliated enterprise, its retained interest in the former affiliated enterprise is measured at fair value. And the difference between such fair value and the disposal price and the carrying amount of the investment on the date it ceases to adopt the equity method is recognized in profit or loss for the current period. In addition, the Company accounted for all amounts recognized in other comprehensive income in relation to the affiliated enterprise on the same basis as would be required if the affiliated enterprise had directly disposed of the related assets and liabilities.. If an investment in the affiliated enterprise becomes a joint venture or an investment in a joint venture becomes an investment in the affiliated enterprise, the Consolidated Company continues to use the equity method without remeasuring the retained interest. The profits and losses resulting from the upstream, downstream and sidestream transactions between the Consolidated Company and the affiliated enterprise are recognized in the financial statements only to the extent of interests in the affiliated enterprise that are not owned by the Consolidated Company.

# (VIII) Property, plant, and equipment

Property, plant, and equipment shall be recognized at cost and subsequently at cost less accumulated depreciation and accumulated impairment losses.

No depreciation is provided for owned land.

The depreciation of property, plant, and equipment (including assets held under finance leases) in its useful life is made on a straight-line basis for each major part/component separately. Where the lease term is less than the useful life of an asset, the depreciation is recognized over the lease term. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

When property, plant, and equipment is derecognized, the difference between the net disposal proceeds and the carrying amount of the asset shall be recognized in profit or loss.

# (IX) Investment property

Investment property is real estate held to earn rentals or for capital appreciation or both. Investment property also includes land held for future use that is currently undetermined.

Investment property is initially measured at cost (including transaction costs) and subsequently measured at cost less accumulated depreciation and accumulated impairment losses. The Consolidated Company provides depreciation on a straight-line basis.

When investment property is derecognized, the difference between the net disposal proceeds and the carrying amount of the asset shall be recognized in profit or loss.

(X) <u>Intangible Assets</u>

# <u>Goodwill</u>

Goodwill acquired through a business merger is measured at cost based on the amount of goodwill recognized on the acquisition date and subsequently measured at cost less accumulated impairment losses.

For the purposes of impairment testing, goodwill is allocated to each cash-generating unit or group of cash-generating units (CGU) of the Consolidated Company that is expected to benefit from the combined effect of the combination. A cash-generating unit subject to goodwill is tested annually (and when there are indications that the unit may be impaired) for impairment by comparing the carrying amount of the unit that contains goodwill with its recoverable amount. If goodwill allocated to a cash-generating unit is acquired in a business merger during the year, the unit should be tested for impairment before the end of the year. If the recoverable amount of a cash-generating unit subject to goodwill is less than its carrying amount, the impairment loss is calculated by first reducing the carrying amount of the cash-generating unit subject to goodwill amount of each asset in proportion to the carrying amount of the other assets in that unit. Any impairment loss is recognized directly as current loss. Impairment losses attributable to goodwill shall not be reversed in subsequent periods.

Upon disposal of an operation within an amortized goodwill cash-generating unit, the amount of goodwill associated with the disposed operation is included in the carrying amount of the operation to determine the gain or loss on disposal.

Others

The intellectual property license fee is amortized on a straight-line basis over the shorter contractual or economic life (three years).

#### (XI) Impairment of tangible and intangible assets (excluding goodwill)

On each balance sheet date, the Consolidated Company reviews its tangible and intangible assets (excluding goodwill) to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and not yet available for use are tested for impairment at least annually and whenever there is an indication of impairment.

The recoverable amount is the fair value minus cost of sales or its value in use, whichever is higher. If the recoverable amount of individual asset or the cash-generating unit is lower than its carrying amount, the carrying amount of the asset or the cash-generating unit shall be reduced to the recoverable amount and the impairment loss shall be recognized in profit or loss.

When the impairment loss is subsequently reversed, the carrying amount of the asset or the cash-generating unit will be reduced to the extent of the recoverable amount prior to revision, provided the increased carrying amount does not exceed the carrying amount (minus amortization or depreciation) of the asset or the cash-generating unit not declared as impairment loss in the previous years. A reversal of an impairment loss is recognized immediately in profit or loss.

#### (XII) Financial Instruments

1. Financial assets

Regular trading of financial assets shall be recognized and derecognized in accordance with trade date accounting.

(1) <u>Types of measurement</u>

The types of financial assets held by the Consolidated Company are financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, and financial assets at amortized cost.

A. Financial assets measured at fair value through profit or loss

Financial asset measured at fair value through profit or loss include financial assets that are compulsively measured at fair value through profit or loss and those designated as measured at fair value through profit or loss. Financial assets that are compulsively measured at fair value through profit or loss include investments in equity instruments not designated by the Consolidated Company as measured at fair value through other comprehensive income or loss, and investments in debt instruments that do not qualify for classification as measured at amortized cost or measured at fair value through other comprehensive income or loss.

Financial assets are designated as measured at fair value through profit or loss on initial recognition if the designation eliminates or significantly reduces the measurement or recognition inconsistency.

Financial assets measured at fair value through profit or loss are measured at fair value, and any gain or loss arising from their remeasurement is recognized in profit or loss. Please refer to Note 6(24) for the determination of fair value.

B. Investments in equity instruments measured at fair value through other comprehensive income or loss

On initial recognition, the Company has an irrevocable option to designate investments in equity instruments that are not held-for-trading and not acquired in a business merger with contingent consideration to be measured at fair value through other comprehensive income.

Investments in equity instruments measured at fair value through other comprehensive income are measured at fair value, with subsequent changes in fair value reported in other comprehensive income and accumulated in other equity. Upon disposal of investments, the accumulated profit and loss are transferred directly to retained earnings and are not reclassified to profit or loss. Dividends from investments in equity instruments measured at fair value through other comprehensive income or loss are recognized in profit or loss when the Company's right to receive them is established, unless the dividend clearly represents a partial recovery of the cost of the investment.

C. Financial assets at amortized cost

The Consolidated Company's investment financial assets is classified as financial assets carried at amortized cost if both of the following two conditions are met:

- a. Financial assets are under a business model whose purpose is to hold financial assets and collecting contractual cash flows; and
- b. The terms of the contract generate a cash flow on a specified date that is solely for the payment of interest on the principal and the amount of principal outstanding.

Subsequent to initial recognition, such financial assets (including cash and cash equivalents, accounts receivable, other receivables, refundable deposits and other financial assets) are measured at the amortized cost equal to the gross carrying amount as determined using the effective interest method less any impairment loss; any foreign exchange gain or loss arising therefrom is recognized in profit or loss.

Except for the following two circumstances, interest income is calculated at the value of effective interest rate times the gross carrying amount of financial assets:

- a. For purchased or originated credit-impaired financial assets, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial assets.
- b. For financial assets that are not purchased or originated credit-impaired but subsequently have become credit-impaired, interest income is calculated by applying the effective interest rate to the amortized cost balance of such financial assets.

Cash equivalents include time deposits within three months from the acquisition date and with high liquidity and relatively low price changes convertible to cash any time. They are used for meeting short-term cash commitments.

#### (2) Impairment of financial assets

The impairment loss of financial assets (including trade receivables), investments in debt instruments measured at fair value through other comprehensive income or loss, and lease receivables and contract assets at amortized cost are measured by the Consolidated Company on the balance sheet date based on the expected credit losses.

Allowances shall be appropriated for trade receivables for expected credit losses for the duration of their existence. A loss allowance for the 12-month expected credit losses is required for a financial asset if its credit risk has not increased significantly since initial recognition. A loss allowance for full lifetime expected credit losses is required for a financial asset if its credit risk has increased significantly since initial recognition.

The expected credit loss is the weighted average credit loss determined by the risk of default. The 12-month expected credit losses represent the expected credit losses arising from the possible default of the financial instrument in the 12 months after the balance sheet date, and the expected credit losses during the lifetime represent the expected credit losses arising from all possible defaults of the financial instrument during the expected existence period.

Through the loss allowance account, the carrying amount of all financial assets is reduced for the impairment loss, except for the investment in debt instruments measured at FVTOCI for which the impairment loss is recognized in other comprehensive income and does not reduce the carrying amount.

#### (3) Derecognition of financial assets

The Consolidated Company derecognizes the financial assets when the contractual rights to the cash inflow from the asset expire or when the company transfers all the risks and rewards of ownership of the financial assets to other enterprises substantially.

If the Consolidated Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and retains control over the asset, it continues to recognize the asset to the extent of its continuing involvement in the asset and recognizes a related liability for the amount that may be required to be paid. If the Consolidated Company retains substantially all the risks and rewards of ownership of the financial asset, it continues to recognize the asset and recognizes the price received as a collateralized loan.

When a financial asset is derecognized in its entirety, the difference between its carrying amount and the sum of the consideration received plus any cumulative gain or loss recognized in other comprehensive income is recognized in profit or loss.

If the transferred asset is part of a larger financial asset and the transferred portion qualifies for overall derecognition, the Consolidated Company allocates the previous carrying amount of the larger financial asset to each portion based on the relative fair values of the continuously recognized portion and the derecognized portion at the date of transfer. The difference between the carrying amount allocated to the excluded component and the consideration received for the excluded component plus the sum of any cumulative gain or loss recognized in other comprehensive income or loss allocated to the excluded component is recognized in profit or loss. The Consolidated Company allocates the cumulative gain or loss recognized in other comprehensive income or loss to each of these components based on the relative fair values of the continuously recognized component and the excluded component and the continuously recognized component and the excluded negative fair values of the continuously recognized component and the excluded component.

2. Equity Instruments

Debt and equity instruments issued by the Consolidated Company are classified as financial liabilities or equity based on the substance of the contractual agreements and the definitions of financial liabilities and equity instruments.

Equity instruments issued by the Consolidated Company are recognized at the acquisition price less direct issue costs.

The Consolidated Company's own equity instruments are recognized and derecognized under equity. The purchase, sale, issuance or cancellation of the Consolidated Company's own equity instruments is not recognized in profit or loss.

- 3. Financial liabilities
  - (1) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method, except for financial liabilities carried at fair value through profit or loss:

Financial liabilities measured at fair value through profit or loss include those held for trading and those designated as measured at fair value through profit or loss.

Financial liabilities held for trading are measured at fair value, and the gain or loss arising from their remeasurement includes any dividends or interest paid on the financial liabilities and is recognized in profit or loss.

The Consolidated Company designates a financial liability as measured at fair value through profit or loss on initial recognition if:

A. The designation eliminates or significantly reduces inconsistencies in measurement or recognition; or

- B. A group of financial assets, financial liabilities, or both, is managed and its performance is evaluated on a fair value basis in accordance with a written risk management or investment strategy, and information on this portfolio provided internally to management of the Consolidated Company is also based on fair value.
- C. A hybrid (combined) contract containing one or more embedded derivatives is specified as a whole.

For financial liabilities designated as at fair value through profit or loss, the amount of change in fair value arising from changes in credit risk is recognized in other comprehensive income and is not subsequently reclassified to profit or loss, but only to retained earnings when the related financial liabilities are derecognized. The amount of the remaining fair value change of the liability is reported in profit or loss. If the recognition of changes in fair value attributable to credit risk in other comprehensive income would cause or aggravate an accounting mismatch, the entire fair value change of the liability is reported in profit or loss.

(2) Derecognition of financial liabilities

When financial liabilities are derecognized, the difference between their carrying amount and the paid consideration (including any transferred non-cash assets or liabilities assumed) shall be recognized in profit or loss.

# (XIII) <u>Revenue recognition</u>

Revenue from sales of merchandise is generated from the sale of electronic components materials and meals. Revenue is recognized when the merchandise is delivered or the meal is served to the customer and the customer obtains control of it. The Consolidated Company receives a portion of the consideration from the customer before transferring the merchandise.

The Consolidated Company is obligated to transfer the merchandise later and therefore recognizes a contract liability.

# (XIV) Leases

The Consolidated Company assesses whether the contract is (or includes) a lease on the date of its establishment.

1. If the Consolidated Company is a lessee:

A lease is classified as a finance lease when the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the asset to the lessee. All other leases are classified as operating leases. When the Consolidated Company subleases right-of-use assets, it uses the right-of-use assets (instead of the subject assets) to determine the classification of the subleases. If a principal tenancy is a short-term lease to which the Consolidated Company applies the recognition exemption, the sublease is classified as an operating lease.

Under operating leases, lease payments, net of lease incentives, are recognized as income on a straight-line basis over the term of the relevant lease. The original direct cost incurred in acquiring an operating lease is added to the carrying amount of the subject asset and recognized as an expense on a straight-line basis over the lease term.

2. If the Group is a lessee:

Except that the leases of low value assets and short-term leases applicable to the exemption are recognized as expenses on a straight-line basis over the lease term, other leases are recognized as right-of-use assets and lease liabilities on the lease commencement date.

The right-of-use asset is initially measured at cost (including the original measured amount of the lease liability, the lease payment paid before the lease commencement date minus the lease incentive received, the original direct cost and the estimated cost of the recovery target asset), and subsequently measured at cost minus the accumulated depreciation and the accumulated impairment loss and adjusted for the remeasurement of the lease liability. A right-of-use asset is presented separately in the balance sheet.

The right-of-use assets shall be depreciated on a straight-line basis from lease commencement date to the end of the useful life or the end of the lease term.

Lease liabilities were originally measured by the present value of lease payments. If the implicit interest rate of lease is easy to determine, the interest rate is used to discount the lease payment. If the interest rate is not easy to determine, the lessee's incremental borrowing rate shall be used.

Subsequently, the lease liability is measured on the basis of amortized cost using the effective interest method, and the interest expense is apportioned during the lease period. In the case that future lease payments change as a result of a change in the lease term, the Group remeasures the lease liability and correspondingly adjusts the right-of-use asset, except in the case when the carrying amount of the right-of-use asset has reduced to zero, in which case any residual remeasured amount shall be recognized in profit or loss. Lease liabilities are expressed separately in the balance sheets.

The variable rent in the lease agreement that is not dependent on the index or rate is recognized as an expense in the period in which it occurs.

#### (XV) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other than those stated above, all other borrowing costs are recognized in profit or loss in the period in which they are incurred.

# (XVI) Employee benefits

1. <u>Short-term employee benefits</u>

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the services.

2. <u>Retirement benefits</u>

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

The costs of defined benefits under the defined benefit pension plan (including service cost, net interest, and the remeasurement amount) are calculated based on the projected unit credit method. The cost of services and the net interest of the net defined benefit liability (asset) are recognized as employee benefit expenses as they occur. The remeasurements (including actuarial gains and losses, changes in the effect of the asset ceiling, and the return on plan assets after interest deduction) are recognized as other comprehensive income and included as retained earnings at the time of occurrence, and are not reclassified to profit or loss in subsequent periods.

Net defined benefit liabilities (assets) are the deficit (balance) of the contribution made according to the defined benefit pension plan. A net defined benefit asset shall not exceed the present value of the contributions to be refunded from the plan, or the reductions in future contributions.

3. Other long-term employee benefits

Other long-term employee benefits are accounted for in the same manner as defined benefit pension plans, except that the related remeasurement is recognized in profit or loss.

4. Post-employment Benefits

The Consolidated Company recognizes a liability for post-employment benefits when the offer of post-employment benefits can no longer be revoked or when the related restructuring costs are recognized, whichever is earlier.

#### (XVII) Income tax

Income tax expenses are the sum of the tax in the current year and deferred income tax.

1. Current income tax

A tax is levied on the unappropriated earnings pursuant to the Income Tax Act and is recorded as an income tax expense in the year when the shareholders' meeting resolves to appropriate the earnings. Adjustments to income tax payable from previous years are recognized in the income tax of current period.

2. Deferred income tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred income tax liabilities are generally recognized for all taxable temporary differences, and deferred income tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which deductible temporary differences and income tax deduction for expenses such as loss deduction can be utilized.

Deferred income tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, affiliated enterprises and association agreements, except where the Consolidated Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and equities are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of the deferred income tax assets is re-examined at each balance sheet date and the carrying amount is reduced for assets that are no longer likely to generate sufficient taxable income to recover all or part of the assets. The carrying amount of items that were not previously recognized as a deferred tax asset is also reviewed at each balance sheet date and is raised when it becomes probable that sufficient taxable profit will be available in the future to recover all or part of the asset.

Deferred income tax assets and liabilities are measured at the tax rate of the period of expected repayment of liabilities or realization of assets. The rate is based on the tax rate and tax laws that have been enacted prior to the balance sheet date or have been substantially legislated. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

# 3. <u>Current and deferred income taxes for the period</u>

Current income tax and deferred income tax are recognized in profit or loss, but the current and deferred income taxes associated with items recognized in other comprehensive profit or loss or directly included in equity are respectively recognized in other comprehensive profit or loss or directly included in equity.

# V. Primary Sources of Uncertainties in Material Accounting Judgments, Estimates, and Assumptions

When the Consolidated Company adopts accounting policies, the management must make judgments, estimates, and assumptions based on historical experience and other critical factors for related information that are not readily available from other sources. Actual results may differ from these estimates.

The management will review the estimates and underlying assumptions on an ongoing basis. If an amendment of an estimate affects only the current period, it is recognized in the period in which it is amended. If an amendment of accounting estimates affects the current year and future periods, it shall be recognized in the period of amendment and future periods.

#### (I) <u>Estimated impairment of receivables</u>

The allowance for losses on the Consolidated Company's accounts receivable were estimated based on the assumptions of default risk and expected loss rate. At each reporting date, the Consolidated Company considers historical experience, current market conditions and forward-looking estimates to determine the assumptions to be used in calculating the impairment and the input values to be selected.

# (II) Fair Value of Level 3 Financial Instruments

When the fair value of financial assets recognized in Level 3 on the balance sheet is not available in an active market, the fair value is determined primarily using market-based valuation techniques. The fair value assessment involves significant judgment, such as the selection of comparable companies or prices for equity transactions, and judgment on various assumptions, such as liquidity discounts and valuation multipliers. Changes in the assumptions used in this model will affect the fair value of the reported financial instruments.

# (III) <u>Impairment of Inventories</u>

The net realizable value of inventories is the estimated selling price in the ordinary course of business less the estimated cost of investment until completion and the estimated cost to complete the sale. These estimates are based on current market conditions and historical sales experience of similar products, and changes in market conditions may materially affect the results of these estimates.

#### (IV) Lease period

In determining the lease period, the Consolidated Company considers all relevant facts and circumstances that give rise to an economic incentive to exercise (or not to exercise) the option, including all expected changes in facts and circumstances from the commencement date to the exercise date of the option. The factors to be considered include the contractual terms and conditions for the period covered by the option, significant improvements in lease equity made during the contract period, and the significance of the underlying assets to the lessee's operations. The lease term will be reassessed if a significant change or a major change in circumstances occurs within the Consolidated Company's control range.

#### VI. Details of Significant Accounts

#### (I) Cash and Cash Equivalents

|                              | Decem | nber 31, 2022 | Decem | ber 31, 2021 |
|------------------------------|-------|---------------|-------|--------------|
| Cash on hand and change fund | \$    | 1,557         | \$    | 1,454        |
| Bank deposits                |       | 98,383        |       | 97,604       |
|                              | \$    | 99,940        | \$    | 99,058       |

The market rate interval of bank deposits on the balance sheet date is as follows:

|      |  | Decen    | nber 31, 2022      | Decem | ber 31, 2021 |
|------|--|----------|--------------------|-------|--------------|
|      | Bank deposits                                | 0.2      | 5%~1.15%           | 0.04  | ₩~0.05%      |
| (II) | Bills receivable, accounts receivable, other | receivab | les and collection | ons   |              |
|      |  | Decen    | nber 31, 2022      | Decem | ber 31, 2021 |
|      | Bills receivable                             |          |                    |       |              |
|      | Bills receivable                             | \$       | -                  | \$    | 16           |
|      | Less: Bad debt allowance                     |          | -                  |       | -            |
|      |  | \$       |                    | \$    | 16           |
|      | Accounts receivable                          |          |                    |       |              |
|      | Accounts receivable                          | \$       | 393,406            | \$    | 283,686      |
|      | Less: Bad debt allowance                     | (        | 160,230)           | (     | 107,715)     |
|      |  | \$       | 233,176            | \$    | 175,971      |

1. The Consolidated Company grants credit for merchandise sales for a period of 30 to 180 days depending on the credit quality of the customer. The Consolidated Company uses a simplified approach to estimate expected credit losses for receivables, which is measured using expected credit losses over the life of the receivables.For this measurement purpose, these kinds of receivables are grouped by common credit risk characteristics that represent the customer's ability to pay all amounts due in accordance with contractual terms and are included in forward-looking information. 2. The Consolidated Company's accounts receivable and collections are analyzed according to the credit period provided to customers as follows:

|   | December 31, 2022 |         | December 31, 2021 |         |
|---|-------------------|---------|-------------------|---------|
| Accounts that have not exceeded the credit period | \$                | 274,661 | \$                | 176,051 |
| Accounts that have exceeded the credit period     |                   | 122,691 |                   | 111,581 |
| Total   | \$                | 397,352 | \$                | 287,632 |

3. Receivables that are overdue at the balance sheet date but for which the Consolidated Company has not recognized an allowance for loss are considered recoverable by the Consolidated Company's management because the credit quality has not materially changed and the Consolidated Company does not hold any collateral or other credit enhancement protection for these receivables. The Consolidated Company adjusted the expected credit loss ratio for some customers in 2020, because some customers are located in areas affected by the COVID 19 pandemic and the loss patterns of these customer groups differ from those of other customer groups.

The accounts receivable and collections are analyzed according to the credit period as follows:

|                   | December 31, 2022 |         | December 31, 2021 |         |
|-------------------|-------------------|---------|-------------------|---------|
| Less than 90 days | \$                | 264,630 | \$                | 159,911 |
| 91-120 days       |                   | 10,031  |                   | 16,140  |
| 121-150 days      |                   | -       |                   | -       |
| 151-180 days      |                   | -       |                   | -       |
| 181-365 days      |                   | -       |                   | -       |
| Over 365 days     |                   | 122,691 |                   | 111,581 |
| Total             | \$                | 397,352 | \$                | 287,632 |

The above is an aging analysis based on the account establishment date.

The aging analysis of receivables that were overdue but not impaired was as follows:

|                   | December 31, 2022 |   | December 31, 2021 |   |  |
|-------------------|-------------------|---|-------------------|---|--|
| Less than 90 days | \$                | - | \$                | - |  |
| 91-120 days       |                   | - |                   | - |  |
| 121-150 days      |                   | - |                   | - |  |
| 151-180 days      |                   | - |                   | - |  |
| 181-365 days      |                   | - |                   | - |  |
| Over 365 days     |                   | - |                   | - |  |
| Total             | \$                | - | \$                | - |  |

The above is an aging analysis based on the account establishment date.

4. Bills receivable, accounts receivable, other receivables and collections changes in allowance for doubtful accounts of the Consolidated Company in 2022 and 2021 are as follows:

|   | <br>2022      |    | 2021    |  |
|---|---------------|----|---------|--|
| Beginning balance   | \$<br>111,661 | \$ | 123,850 |  |
| Expected gain on reversal of credit<br>losses (rebound benefits)<br>Actual elimination for the period | 50,965        | (  | 11,772) |  |
| Foreign currency translation differences  | 1,550         | (  | 417)    |  |
| Ending balance  | \$<br>164,176 | \$ | 111,661 |  |

5. The aging analysis of receivables that were impaired was as follows:

Accounts receivable and collections

|                   | Decem | December 31, 2022 |    | December 31, 2021 |  |
|-------------------|-------|-------------------|----|-------------------|--|
| Less than 90 days | \$    | 41,875            | \$ | -                 |  |
| 91-120 days       |       | 10,031            |    | 16,140            |  |
| 121-150 days      |       | -                 |    | -                 |  |
| 151-180 days      |       | -                 |    | -                 |  |
| 181-365 days      |       | -                 |    | -                 |  |
| Over 365 days     |       | 122,691           |    | 111,581           |  |
| Total             | \$    | 174,597           | \$ | 127,721           |  |

The above aging analysis is based on the accounts receivable closing date and accounts receivable management policy.

(III) <u>Inventories</u>

|                     | Decen | December 31, 2022 |    | December 31, 2021 |  |
|---------------------|-------|-------------------|----|-------------------|--|
| Commodities         | \$    | 190,470           | \$ | 237,230           |  |
| Finished Products   |       | -                 |    | 133               |  |
| In-process products |       | -                 |    | 4,180             |  |
| Materials           |       | 7                 |    | 119               |  |
| Raw Material        |       | 29,297            |    | 14,329            |  |
|                     | \$    | 219,774           | \$ | 255,991           |  |

1. The cost of goods sold related to inventories was NT\$923,797 and NT\$719,997 thousand for 2022 and 2021, respectively.

2. The cost of goods sold for the year 2022 and 2021 included a loss of NT\$38,110 thousand on inventory decline and a gain of NT\$6,293 thousand on the recovery of inventory decline, respectively. The benefit of the recovery in 2021 was due to the elimination of some inventory that had fallen in value.

## (IV) Financial assets measured at fair value through profit or loss - Non-current

|                                | December 31, 2022 | December 31, 2021 |
|--------------------------------|-------------------|-------------------|
| Domestic unlisted stocks       |                   |                   |
| Chen Wei Technologies Co., LTD | \$ -              | \$ -              |

Chen Wei Technologies Co., LTD is mainly engaged in the manufacturing of electronic components. The management of the Consolidated Company clearly certifies that it does not have a significant impact on Chen Wei Technologies Co., LTD.

(V) <u>Financial assets measured at fair value through other comprehensive profit or loss-Non-</u> current

December 31, 2022 December 31, 2021

Overseas unlisted stocks

Intelligo Technology INC \$ 12,898 \$ -

Intelligo Technology INC's main operating businesses are IC chip design, production and sales. The management of the Consolidated Company has clearly demonstrated that it has no significant influence on Intelligo Technology INC.

#### (VI) <u>Subsidiary</u>

1. Subsidiaries included in the consolidated financial statements

The entities involved in the preparation of the Consolidated Financial Statements are listed as follows:

|                         |                 |                                    | Shareholding | g Percentage |             |

- 1. For the years of 2022 and 2021, the equity method was applied to the profit or loss of subsidiaries and affiliated enterprises and the share of other comprehensive income or loss, except for an affiliated enterprise, Longshan Yule Development Co., LTD which completed the settlement of its shareholding on March 28, 2022, and therefore only the profit or loss for the first quarter of 2022 was recognized without audit, based on the audited financial statements of each subsidiary for the same period.
- 2. As of December 31, 2021, there were no pledges for investments accounted for using the equity method.

# (XIV) <u>Bills Payables</u>, Payables receivable and other collections

- 1. As of December 31, 2022 and 2021, the interest rates of long-term loans were 2.42%~2.92% and 1.00%-2.99%, respectively.
- 2. Please refer to Note 8 for the amount of collaterals provided by the Consolidated Company as collaterals for loans.

## (XVI) Post-retirement Benefit Plan

- 1. Defined contribution plans
  - (1) The pension system applicable to the Company and its domestic subsidiaries in the Consolidated Company under The "Labor Pension Act" is a defined contribution plan under government administration, to which the Group contributes 6% of each employee's monthly salary and wages to their personal accounts at the Bureau of Labor Insurance.
  - (2) The employees of the Consolidated Company's subsidiary in Hong Kong (i.e. Joint Harvest Industries Limited) are members of a retirement benefit plan operated by the Hong Kong government. The subsidiary is required to contribute a specified percentage of payroll costs to a retirement benefit plan to fund the plan. The subsidiary's obligation for this government-operated retirement benefit plan is only to contribute a specified amount.

- (3) The employees of the Consolidated Company's subsidiary in the mainland of China (i.e. Juhong Technology (Shenzhen) Co., Ltd.) are members of a retirement benefit plan operated by the government of the People's Republic of China. The subsidiary is required to contribute a specified percentage of payroll costs to a retirement benefit plan to fund the plan. The subsidiary's obligation for this government-operated retirement benefit plan is only to contribute a specified amount.
- (4) For the years of 2022 and 2021, the Consolidated Company recognized a total of NT\$6,195 thousand and NT\$5,577 thousand, respectively, in the consolidated statements of income in accordance with the proportionate share of the defined contribution plan.
- 2. Defined benefit plans
  - (1) The Consolidated Company is pension system under the "Labor Standards Act" is a defined benefit pension plan managed by the government. The payment of the employee's pension is based on the period of service and the average salary of 6 months before the approved retirement date. The Consolidated Company contributes 2% of employees' monthly salaries to the pension fund, which is deposited in the name of the Supervisory Committee of Business Entities' Labor Retirement Reserve in a special account at the Bank of Taiwan. If the estimated balance of the special account before the end of the year is not enough to pay for the workers who are expected to meet the retirement requirements in the following year, the difference will be withdrawn in one lump sum by the end of March of the following year. The management of the special account is entrusted to the Bureau of Labor Funds, Ministry of Labor. The Consolidated Company has no right to influence the investment management strategy.
  - (2) The amounts included in the consolidated balance sheet for defined benefit plans are shown below

|                          | December 31, 2022 |        | Decem | ber 31, 2021 |

| payment                             | <u> </u> |         | <u> </u> |        |    |         |
| December 31, 2022                   | \$       | 19,778  | \$(      | 7,009) | \$ | 12,769  |

The amounts recognized in profit or loss for defined benefit plans are summarized by function as follows:

|                                     | 2  | 2022 | 2021 |     |  |
|-------------------------------------|----|------|------|-----|--|
| Selling expenses                    | \$ | 610  | \$   | 670 |  |
| General and administrative expenses |    | 170  |      | 61  |  |
|                                     | \$ | 780  | \$   | 731 |  |

- (4) The Company is exposed to the following risks as a result of the pension system of the "Labor Standards Act":
  - A. Investment risk: The Bureau of Labor Funds, Ministry of Labor invests the Labor Pension Fund in domestic and foreign equity securities, debt securities and bank deposits through its own use and entrusted operation. The amount allocated to the Consolidated Company's plan assets is based on the income at an interest rate no less than the local bank's two-year time deposit rate.

- B. Interest rate risk: A decrease in interest rates will increase the present value of the defined benefit obligation, but the investment return on plan assets will also increase, which will have a partially offsetting effect on the net defined benefit obligation.
- C. Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salary of the plan member. As a result, increases in plan members' salaries will increase the present value of the defined benefit obligation.
- (5) The present value of the Company's planned assets and defined benefit obligations are determined by a qualified actuary. The key assumptions of the actuarial valuation as of the measurement date are presented below:

|                                  | December 31, 2022  | December 31, 2021  |
|----------------------------------|--|--|
| Discount rate                    | 1.20%  | 0.60%  |
| Expected rate of salary increase | 2.75%  | 2.75%  |
| Mortality rate                   | The parent company<br>adopted the 6th<br>experience life table<br>of Taiwan life<br>insurance industry | The parent company<br>adopted the 6th<br>experience life table<br>of Taiwan life<br>insurance industry |

(6) The amount by which the present value of the defined benefit obligation would increase (decrease) if there were reasonably possible changes in significant actuarial assumptions, respectively, with all other assumptions held constant, is as follows:

|                                  | December 31, 2022 |      | December 31, 2021 |      |
|----------------------------------|-------------------|------|-------------------|------|
| Discount rate                    |                   |      |                   |      |
| Increase by 0.25%                | \$(               | 244) | \$(               | 397) |
| Decrease by 0.25%                | \$                | 249  | \$                | 405  |
| Expected rate of salary increase |                   |      |                   |      |
| Increase by 0.25%                | \$                | 196  | \$                | 321  |
| Decrease by 0.25%                | \$(               | 194) | \$(               | 317) |

The sensitivity analysis above may not reflect actual changes in the present value of the defined benefit obligation as the actuarial assumptions may be correlated with each other and changes in only one assumption are not probable.

(7) The amounts expected to be contributed in the coming year are as follows:

|   | December 31, 2022 |       | December 31, 2021 |       |
|---|-------------------|-------|-------------------|-------|
| Amount expected to be<br>withdrawn within 1 year<br>Average period of defined | \$                | 70    | \$                | 121   |
| benefit obligation  | 5 y               | /ears | 5                 | years |

- (1) If the Company has a net profit for the current year, it shall first use the profit to pay income taxes and make up for any accumulated losses, and then set aside 10% as a legal capital reserve. Any excessive balance may be reserved or transferred to be a special reserve pursuant to relevant laws. Any remaining balance in retained earnings may be appropriated for dividends in accordance with a proposal for appropriation of earnings as approved by the Board of Directors and submit it to the shareholders' meeting for distribution of shareholder dividends.
- (2) The Company shall set aside a legal reserve until it equals the Company's paid-in capital. The legal reserve may be used to make up for losses. When the Company has no loss, the portion of the legal reserve exceeding 25% of the total paid-in capital may be appropriated in the form of cash, in addition to being transferred to share capital.
- (3) The shareholders' meetings approved the distribution of earnings for years 2021 and 2020 on May 31, 2022 and August 18, 2021, respectively, as follows:

|                 | Surplus distribution case |    |      | Dividends Per Share (NT\$) |      |   |      |   |
|-----------------|---------------------------|----|------|----------------------------|------|---|------|---|
|                 | 20                        | 21 | 2020 |                            | 2021 |   | 2020 |   |
| Legal reserve   | \$                        | -  | \$   | -                          |      |   |      |   |
| Special reserve |                           | -  |      | -                          |      |   |      |   |
| Cash dividends  |                           | -  |      | -                          | \$   | - | \$   | - |
| Stock dividends |                           | -  |      | -                          |      | - |      | - |

(4) The Company has provided for and reversed the special reserve in accordance with the provisions of JinGuanZhengFaZi Letter No. 1090150022.

## 4. Other equity items

(1) Financial statements translation differences of foreign operations

|                                   | 2022 |        | 2021 |        |
|-----------------------------------|------|--------|------|--------|
| Beginning balance                 | \$(  | 5,627) | \$(  | 3,958) |
| Financial statements translation  |      |        |      |        |
| differences of foreign operations |      | 6,740  | (    | 2,086) |
| Related income tax                | (    | 1,347) |      | 417    |
| Ending balance                    | \$(  | 234)   | \$(  | 5,627) |

(2) Unrealized valuation gains or losses on financial assets measured at fair value through other comprehensive profit or loss

|                               | <br>2022       | 2021 |  |   |
|-------------------------------|----------------|------|--|---|
| Beginning balance             | \$<br>-        | \$   |  | - |
| Unrealized gains or losses on |                |      |  |   |
| investments in equity         |                |      |  |   |
| instruments measured at fair  |                |      |  |   |
| value                         | (22,839)       |      |  | - |
| through other comprehensive   |                |      |  |   |
| income                        |                |      |  | - |
| Ending balance                | \$<br>(22,839) | \$   |  | - |

Investments in equity instruments measured at fair value through other comprehensive income are measured at fair value, with subsequent changes in fair value reported other comprehensive income and accumulated in other equity. Upon disposal of investments, the accumulated profit and loss are transferred directly to retained earnings and are not reclassified to profit or loss.

5. Non-controlling interests

- 1. In accordance with the provisions of the Articles of Association the Company sets aside employee compensation and remuneration for directors and supervisors at a rate of not less than 5%-10% and not more than 2% on the pre-tax benefits before deduction of the distribution of employee compensation and compensation to directors and supervisors for the current year. However, if the Company still has accumulated losses, the Company should first make up for them.
- 2. The remuneration of employees and remuneration of directors and supervisors for the years of 2022 and 2021, as approved by the Board of Directors, are as follows:

- 3. The amount of compensation to employees and directors and supervisors resolved by the board of directors is not materially different from the amount recognized in the financial statements for the years of 2022 and 2021. If there is any change in the amount after the annual financial statements are approved and issued, it will be adjusted and recorded in the following year in accordance with the changes in accounting estimates.

# 6. Income tax assessment

The Company's income tax returns have been approved by the tax authorities up to 2020 and no significant tax administrative relief has been provided. The rest of the domestic and foreign subsidiaries are reported in accordance with the laws and regulations of each country.

# (XXII) Earnings per Share

|                            |      |      | Unit: In Shares or NTS |       |  |  |
|----------------------------|------|------|------------------------|-------|--|--|
|                            | 2022 |      | 2021                   |       |  |  |
| Basic earnings per share   | \$   | 0.83 | \$(                    | 0.83) |  |  |
| Diluted earnings per share | \$   | 0.83 | \$(                    | 0.83) |  |  |

Net income and weighted average number of common shares used for calculation of earnings per share are as follows:

#### 1. <u>Net profit for the period</u>

|   | 2022         | 2021 |         |
|---|--------------|------|---------|
| Net profit used to calculate basic<br>and earnings per share<br>Effect of potentially dilutive<br>common shares: None | \$<br>57,406 | \$(  | 57,571) |
| Net profit used to calculate diluted earnings per share   | \$<br>57,406 | \$(  | 57,571) |

#### Number of Shares 2.

|   |        | Unit: Thousand shares |
|---|--------|-----------------------|
|   | 2022   | 2021                  |

| share   | 69,514 | 69,514                |
| Effect of potentially dilutive  |        |                       |
| common shares: None   | -      | -                     |
| Weighted average number of  |        |                       |
| common shares used for  |        |                       |
| calculation of diluted earnings   |        |                       |
| per share   | 69,514 | 69,514                |

# (XXIII) Capital Risk Management

The purpose of the Consolidated Company's capital management policy is to ensure the Consolidated Company's ability to continue as a going concern in order to maximize shareholder compensation. To ensure that the above objectives are met, the management of the Consolidated Company regularly reviews its capital structure, taking into account the general economic conditions, prevailing interest rates and the adequacy of cash flows from operating activities, and adjusts the capital structure by paying dividends, issuing new shares, repurchasing shares, and issuing or redeeming bonds.

The Group is not subject to any other external capital requirements.

## (XXIV) Financial Instruments

#### 2. Financial risk management objectives and policies

The Consolidated Company's major financial instruments include cash and cash equivalents, notes and accounts receivable, notes and accounts payable, corporate bonds payable, and long-term and short-term borrowings. The financial department of the Consolidated Company provides services for the business units, coordinates the operation of the domestic financial market, and supervises and manages financial risks related to the operation by analyzing the internal risk reports of the risks according to the level and scope of risks. Such risks include market risk (including exchange rate risk and interest rate risk), credit risk, and liquidity risk.

The Consolidated Company does not engage in transactions of financial instruments (including derivative financial instruments) for speculative purposes. The Financial Department reports to the Board of Directors of the Company on a quarterly basis.

- (1) Market risk
  - A. Foreign exchange risk

The operations of the Company and its foreign subsidiaries are mainly conducted in foreign currencies. Therefore, the exchange rate risk arises.

The Consolidated Company's foreign currency receivables and payables are partly in the same currency, and a natural hedge effect is generated for a substantial portion of the site. The Consolidated Company regularly reviews the net position of assets and liabilities in each currency and manages the risk of the net position. Currently the Consolidated Company's foreign currency receivables and payables are not exposed to significant exchange rate changes due to the short maturity of each transaction. The Consolidated Company engages in business involving certain nonfunctional currencies and is therefore subject to exchange rate fluctuations. Information on foreign currency assets and liabilities that are subject to significant exchange rate fluctuations is as follows:

(In Thousands of Foreign Currency or Thousands of New Taiwan Dollars)

Note: Since the functional currency of the consolidated entity is not the New Taiwan Dollar, it must be taken into account when making disclosures. For example, if the functional currency of a subsidiary is the Hong Kong Dollar but there is a foreign currency component other than the U.S. Dollar, it must be taken into account.

B. Interest rate risk

The Consolidated Company's short-term borrowings bear floating interest rates, resulting in interest rate risk. The carrying amounts of financial assets and financial liabilities of the Group exposed to interest rate risk on the balance sheet date are as follows:

|                                   | December 31, 2022 |         | December 31, 2021 |         |  |
|-----------------------------------|-------------------|---------|-------------------|---------|--|
| Cash flow interest                |                   |         |                   |         |  |
| rate risk - financial liabilities | \$                | 228,880 | \$                | 419,905 |  |
| G                                 |                   |         |                   |         |  |

#### Sensitivity analysis

The sensitivity analysis below is prepared based on the risk exposure of nonderivative instruments to the interest rates at balance sheet date. For variablerate liabilities, the analysis is based on the weighted-average amount over the reporting period. The rate of change used when reporting interest rates within the Group to the main management is an increase or decrease of 1% in interest rates, which also represents the management's assessment of the reasonably possible range of changes in interest rates. If interest rates increase/decrease by 1%, and all other variables remain unchanged, the Company's net profit before tax will increase/decrease by NT\$3,974 thousand and NT\$3,776 thousand for 2022 and 2021, respectively.

The Consolidated Company's sensitivity to interest rates increased in the current period compared to the previous period mainly due to the increase in the weighted average amount of variable-rate debt instruments.

(2) Credit risk

Credit risk refers to risk that causes the financial loss of the Group due to a counterparty's delay in performing contractual obligations. As of the balance sheet date, the Consolidated Company's largest credit risk exposure from a counterparty's failure to fulfill obligations came from the carrying amount of financial assets recognized in the consolidated balance sheets.

The main potential credit risk of the Consolidated Company arises from financial instruments with accounts receivable. The Consolidated Company's sales to more than 10% of its customers accounted for 59% and 59% of its operating revenues for the years of 2022 and 2021, respectively, and their accounts receivable balances were approximately 59% and 49% as of December 31, 2022 and 2021, respectively. To reduce credit risk, the Consolidated Company periodically and continuously evaluates the financial position of its customers and the collectibility of their receivables, and provides an allowance for doubtful accounts.

(3) Liquidity risk

The Consolidated Company manages and maintains sufficient cash and cash equivalents to support its operations and mitigate the impact of cash flow fluctuations. The management of the Group supervises the use of the credit line and ensures compliance with the terms of the loan contracts.

Bank loans are an important source of liquidity for the Consolidated Company. As of December 31, 2022 and 2021, the Consolidated Company had unused banking facilities of NT\$39,265 thousand and NT\$108,695 thousand, respectively.

## Liquidity Risk and Interest Rate Risk Table

The following table details the analysis of the remaining contractual maturities of the Consolidated Company's non-derivative financial liabilities with contractual repayment periods, which are based on the earliest possible date on which the Consolidated Company could be required to make repayments, and is prepared using the undiscounted cash flows of the financial liabilities, which include cash flows of interest and principal. Specifically, the Group's bank borrowings with repayment on demand clause are included in the earliest time band regardless of the probability of the banks choosing to exercise their rights immediately. The analysis of maturity dates for other non-derivative financial liabilities is based on the agreed repayment dates.

The amount of floating-rate instruments for the above non-derivative financial liabilities will vary depending on the difference between the floating rate and the interest rate estimated at the balance sheet date.

- 2. Fair value information
  - (1) Financial instruments not measured at fair value

The management of the Consolidated Company considers that carrying amount of financial instruments not carried at fair value (measured at amortized cost) approximates their fair value.

- (2) Financial instruments measured at fair value
  - A. Fair value levels

| December 31, 2022  |             |         |           |            |

Note 1: If the terms of the related party transaction are different from the normal terms of the transaction, the differences and the reasons for the differences should be described in the unit price and credit period columns.

Note 2: If there is any prepayment, the reason, contract terms, amount and difference from the general transaction type should be stated in the Remarks column.

Note 3: Paid-in capital represents the parent company's paid-in capital. If the issuer's stock has no par value or the par value per share is not NT\$10, the transaction amount of 20% of the paid-in capital is calculated based on 10% of the equity attributable to the owners of the parent company in the balance sheet.

| 4                  | Chi Ching Co., Ltd.                    | Chi Pin Restaurant Co., Ltd.           | 3  | Bills receivable    | 126        |                                  | 0.01%   |

Note 1: Information on business transactions between the parent company and the subsidiary company should be indicated in the numbered column respectively, and the number should be filled in as follows:

- (1) Filling in 0 for the parent company.
- (2) A subsidiaries is numbered starting from number 1.
- Note 2: There are three types of relationships with the counter-parties as follows, and it is sufficient to indicate the type of relationship (if it is the same transaction between a parent and a subsidiary or between subsidiaries, there is no need to disclose it repeatedly.
  - For example, if a parent company discloses a transaction with a subsidiary does not need to repeat the disclosure; if a subsidiary discloses a transaction with a subsidiary does not need to repeat the disclosure):
  - (1) Parent company to subsidiary company.
  - (2) Subsidiary company to parent company.
  - (3) Subsidiary to Subsidiary.
- Note 3: For the calculation of the ratio of transaction amount to consolidated total revenue or total assets, if it is an asset and liability item, the calculation is based on the ending balance to consolidated total assets. In the case of profit and loss items, the cumulative amount is calculated as a percentage of the consolidated total revenue.

|----------------------------|-----------------------|--------------------|
| Name of Major Shareholders | Number of shares held | Shareholding Ratio |
| Cheng, Yuan-Ching          | 3,784,483             | 5.44 %             |

- Note 1: This table is based on the last business day at the end of each quarter, and the information of shareholders holding 5% or greater of the ordinary and preference shares that have completed delivery without physical registration (including treasury shares) at the end of each quarter. Share capital indicated in the Company's parent company only financial statements may differ from the actual number of shares that have been issued and delivered without physical registration as a result of different basis of preparation.
- Note 2: If a shareholder delivers its shareholding information to the trust, the aforesaid information shall be disclosed by the individual trustee who opened the trust account. For information on shareholders, who declare to be insiders holding more than 10% of shares in accordance with the Securities and Exchange Act, and their shareholdings including their shareholdings plus their delivery of trust and shares with the right to make decisions on trust property, please refer to MOPS.

## IV. Individual Financial Statements for the Most Recent Fiscal year, Certified by a CPA

No. 63, Dingxiang St., Sanmin Dist., Kaohsiung City 807, Taiwan

# Independent Auditors' Report

T+ 886 (7) 359 0669

Chip Hope Co., Ltd.,

## Audit Opinion

We have audited the accompanying parent company only financial statements of Chip Hope Co., Ltd. (the "Company"), which comprise the parent company only balance sheets as of December 31, 2022 and 2021, and the parent company only statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the parent company only financial statements, including a summary of significant accounting policies (collectively referred to as the "parent company only financial statements").

In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and its financial performance and cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers of the Republic of China.

## **Basis for Opinion**

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the parent company only financial statements of the Company for the year ended December 31, 2022. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matters identified in the audit of the parent company only financial statements of the Company for the year ended December 31, 2022 are as follows:

## Allowance for doubtful accounts receivable

The accounting policies with respect to accounts receivable are discussed in Note 4(11) financial instruments to the parent company only financial statements. For details, please refer to Note 6(2) notes receivable, accounts receivable, other receivables, and overdue receivables.

Description of key audit matters:

As of December 31, 2022, the Company's accounts receivable (excluding those from subsidiaries) amounted to NT\$227,090,000, accounting for 30% of the total assets in the parent company only financial statements. The estimated impairment of the accounts receivable of the Company relates to the judgment that the amounts may not be recovered. The management, in accordance with International Financial Reporting Standards (IFRS) 9, recognized the loss on allowance for accounts receivable based on expected credit loss from continuing operations. The above estimation involves the management's subjective judgment and credit risk assumptions. Therefore, the estimated impairment of accounts receivable from the Company is included as one of the key audit matters for the year.

The audit procedures are summarized as follows:

We tested and assessed whether management's policy on the allowance for doubtful accounts receivable was reasonable; we tested the aging of accounts receivable balances and verified whether management's allowance for doubtful accounts was correct; and we assessed the post-period recovery of accounts receivable to see if the allowance for doubtful accounts was adequate.

#### Revenue recognition

The accounting policies with respect to revenue recognition are discussed in Note 4(12) revenue recognition to the parent company only financial statements. For details, please refer to Note 6(15) operating income to the parent company only financial statements.

Description of key audit matters:

Revenue is recognized under individual sales contracts when control of the merchandise is transferred. Because the Company enters into different trading terms with individual customers, whether to identify the transfer of control of merchandise based on the trading terms of individual sales targets and recognize revenue accordingly has a significant impact on the financial statements' reliability. As a result, it is listed as a key audit matter.

The audit procedures performed by us are summarized as follows:

We sought to understand the accounting policies adopted by the Company for revenue recognition and compared them with the terms of sales to assess whether the policies adopted were appropriate; we sampled internal controls and individual revenue transactions related to revenue recognition and verified relevant customer orders, shipping certificates, and collection documents; and we sampled sales transactions before and after the reporting date and reviewed relevant documents to assess whether the revenue recognition periods were appropriate.

## Responsibilities of Management and Those Charged with Governance for the Parent Company Only Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of the parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is also responsible for assessing the ability of the Company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the financial reporting process of the Company

## Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error. Misstatements are considered material if individual or aggregate amount of misstatements could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with the auditing standards of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We have also performed the following tasks:

- 1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision, and performance of the parent company only audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We provided the governance units with a statement assuring the personnel of our accounting firm who are subject to independent regulations had acted according to the Norm of Professional Ethics for Certified Public Accountant of the Republic of China to remain neutral and also communicated with them about all relations and other matters (including related preventive measures) that could affect the independence of certified public accountants.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements for the year ended December 31, 2022 are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

# <u>Chip Hope Co., Ltd.</u> <u>Notes to Parent Company Only Financial Statements</u> <u>For the Years of 2022 and 2021</u>

(In Thousands of New Taiwan Dollars) (Unless Stated Otherwise)

## I. <u>Company History</u>

Chip Hope Co., Ltd. (the Company) was established and commenced operations on December 6, 1993. The main business items include the manufacture, design and trading of electronic component materials, finished products, semiconductors, communications equipment, machinery and equipment, electrical equipment, general instrumentation, other optical and precision instruments, medical equipment, metrology and measuring instruments, computer equipment and software. The Company's shares started to be traded on the Taipei Exchange on March 8, 2004. These parent company only financial statements are presented in the New Taiwan dollar, the

Company's functional currency.

 II. Date of Authorization for Issuance of the Financial Statements and Procedures for Authorization These parent company only financial statements have been approved by the Board of Directors on March 29, 2023.

## III. Application of New and Amended Standards and Interpretations

(I) <u>The newly issued and amended International Financial Reporting Standards (IFRS)</u> endorsed by the Financial Supervisory Commission ("FSC") have been adopted.

The following table presents the newly issued, amended and revised content and interpretations of the IFRS approved by the FSC for the year of 2022:

|  | Effective Date of        |
|--|--------------------------|
|  | International Accounting |
| New/Revised/Amended Standards and                      | Standards Board (IASB)   |
| Interpretations  | Release                  |
| Amendments to IFRS 3 "Reference to the Conceptual      | January 1, 2022          |
| Framework"   |                          |
| Amendments to IAS 16 "Property, Plant, and Equipment - | January 1, 2022          |
| Proceeds before Intended Use"                          |                          |
| Amendments to IAS 37 "Onerous Contracts - Cost of      | January 1, 2022          |
| Fulfilling a Contract"                                 |                          |
| Annual Improvements to 2018-2020 Cycle                 | January 1, 2022          |
|  |                          |

The Company has assessed that the above standards and interpretations have no material impact on the Company financial position and financial performance.

(II) The newly issued and amended IFRS endorsed by the FSC have not yet been adopted.

The following table presents the newly issued, amended and revised content and interpretations of the IFRS approved by the FSC for the year of 2023:

|  | Effective Date of        |
|--|--------------------------|
|  | International Accounting |
| New/Revised/Amended Standards and                        | Standards Board (IASB)   |
| Interpretations  | Release                  |
| Amendments to IAS 1 "Disclosure of Accounting Policies"  | January 1, 2023          |
| Amendments to IAS 8 "Definition of Accounting Estimates" | January 1, 2023          |
| Amendments to IAS 12 "Deferred Tax Related to Assets and | January 1, 2023          |
| Liabilities Arising from a Single Transaction"           | -                        |

The Company has assessed that the above standards and interpretations have no material impact on the Company financial position and financial performance.

#### (III) Effect of IFRS issued by the IASB but not yet endorsed by the FSC

The following table presents the newly issued, amended and revised standards and interpretations of IFRS that have been issued by the IASB but not yet incorporated into IFRS that are endorsed by the FSC:

| New/Revised/Amended Standards and<br>Interpretations                             | Effective Date of<br>International Accounting<br>Standards Board (IASB)<br>Release |
|--|--|
| Amendments to IFRS 10 and IAS 28 "Sale or Contribution                           | To be decided by the IASB  |
| of Assets between an Investor and Its Affiliated Enterprise<br>or Joint Venture" |  |
| Amendments to IFRS 16 "Lease Liability in a Sale and                             | January 1, 2024  |
| Leaseback"   |  |
| IFRS 17 "Insurance Contracts"  | January 1, 2023  |
| Amendments to IFRS 17 "Insurance Contracts"                                      | January 1, 2023  |
| Amendments to IFRS 17 "First-time Adoption of IFRS 17                            | January 1, 2023  |
| and IFRS 9" - Comparative Information  |  |
| Amendments to IAS 1 "Classify Liabilities as Current or Non-current"             | January 1, 2024  |
| Amendments to IAS 1 "Non-current Liabilities with                                | January 1, 2024  |
| Covenants"   | 5 and any 1, 2027  |

The Company has assessed that the above standards and interpretations have no material impact on the Company financial position and financial performance.

#### IV. Summary of Significant Accounting Policies

#### (I) <u>Compliance declaration</u>

These parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

#### (II) <u>Preparation basis</u>

These parent company only financial statements have been prepared on a historical cost basis, except for financial instruments measured at fair value.

The fair value measurement is classified into three levels based on the observability and importance of related input:

- 1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities on the measurement date.
- 2. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. deduced from prices).
- 3. Level 3 inputs are unobservable inputs for the asset or liability.

In preparing its financial statements, the Company adopts the equity method of accounting for its investments in subsidiaries, affiliated enterprises or joint ventures. In order to make the profit or loss for the year, other comprehensive income and equity in the individual financial statements the same as the profit or loss for the year, other comprehensive income and equity attributable to the owners of the Company in the consolidated financial statements, certain accounting differences between the individual basis and the consolidated basis are adjusted for "investments accounted for using the equity method" and "share of profit or loss of subsidiaries, affiliated enterprises and joint ventures accounted for using the equity method" and related equity items.

## (III) Standards for assets and liabilities classified as current and non-current

Current assets include:

- 1. Assets held primarily for trading purposes;
- 2. Assets expected to be realized within 12 months after the balance sheet date; and
- 3. Cash or cash equivalents (excluding assets restricted from being exchanged or used to settle a liability for at least 12 months after the balance sheet date).

Current liabilities include:

- 1. Liabilities held primarily for trading purposes;
- 2. liabilities due for settlement within 12 months of the balance sheet date (current liabilities even if long-term refinancing or rescheduling agreements are completed after the balance sheet date and prior to the adoption of the published financial statements), and
- 3. Liabilities with a repayment schedule that cannot be unconditionally deferred till at least 12 months after the publication of the balance sheet. The terms of the liabilities may be settled by the issuance of equity instruments at the option of the counter-parties, but this does not affect the classification.

All other assets or liabilities that are not specified above are classified as non-current.

#### (IV) Foreign currencies

In the preparation of financial statements, transactions denominated in a currency other than the Company's functional currency (i.e. foreign currency) are translated into the Company's functional currency by using the exchange rate at the date of the transaction.

Monetary items denominated in foreign currencies are translated at the closing rates on the balance sheet date. Exchange differences arising on the settlement or on translating of monetary items are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are translated at the exchange rates prevailing at the date when the fair value was determined. The resulting exchange difference is recognized in profit or loss, except for items whose changes in fair value are recognized in other comprehensive income, where the resulting exchange difference is recognized in other comprehensive income.

Non-monetary items measured at historical cost that are denominated in foreign currencies are translated at the rates of exchange prevailing on the transaction dates and are not retranslated.

In the preparation of the parent company only financial statements, the assets and liabilities of foreign operations (including subsidiaries, affiliates, joint ventures, or branches that operate in a country or currency different from the Company) are translated into the New Taiwan Dollar at the closing rate of exchange prevailing on the balance sheet date. Income and expenses are translated at the average rate of the year. The exchange differences arising are recognized in other comprehensive income.

If the Company disposes of all the equity of the foreign operations, or disposes of part of the equity of the foreign operations' subsidiary but loses control, or disposes of the foreign operations' joint agreement or the retained equity after the affiliate is a financial asset and is treated in accordance with the accounting policy of the financial instrument, all accumulated exchange differences associated with the foreign operations will be reclassified to profit or loss.

If the partial disposal of a foreign operating subsidiary does not result in a loss of control, the cumulative exchange difference is attributed to the interest on a pro rata basis and is not recognized in profit or loss. In the case of any other partial disposal of foreign operations, the accumulated exchange differences are reclassified to profit or loss in proportion to the disposal.

#### (V) Inventories

Inventories include merchandise, raw materials, supplies, finished goods and semi-finished goods. Inventory costs are calculated using the weighted average method. Inventories are measured at the lower of cost and net realizable value. The comparison between costs and net realizable values is based on individual items except for the same type of inventory. The net realizable value is the estimated selling price in the ordinary course of business less the estimated costs to be invested to completion and the estimated costs to complete the sale. Cost of inventory is calculated using the weighted-average method.

#### (VI) Investments in subsidiaries

The Company handles investments in subsidiaries by using the equity method.

A subsidiary is an entity (including a structured entity) over which the Company has control.

Under the equity method, the investment is initially recognized at cost. The carrying amount of investment is adjusted thereafter for the post-acquisition changes in the Company's share of profit or loss and other comprehensive income and profit distribution of the subsidiaries. In addition, changes in the Company's share of subsidiaries' other equity are recognized in proportion to its shareholding ratio.

When a change in the Company's ownership interests in a subsidiary does not cause it to lose control of the subsidiary, it shall be accounted for as an equity transaction. The difference between the carrying amount of the investments and the fair value of the consideration paid or received is recognized directly in equity.

When the Company's share of losses of a subsidiary equals or exceeds its interest in that subsidiary (including any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Company's net investment in the subsidiary), the Company shall continue to recognize losses based on the shareholding ratio.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets, and liabilities of subsidiaries recognized at the date of acquisition is recognized as goodwill, which is included in the carrying amount of the investment and may not be amortized. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition is recognized as profit or loss in the current year.

When the Company assesses impairment, the test shall be performed on the basis of cash generating units within the financial statements. The recoverable amount and the carrying amount of cash generating units shall be compared. Subsequently, if the recoverable amount of an asset increases, the recovery of the impairment loss shall be recognized as an advantage, provided that the carrying amount of the asset recovered from the impairment loss shall not exceed the carrying amount of the asset to be amortized if the impairment loss is not recognized. Impairment losses attributable to goodwill shall not be reversed in subsequent periods.

When the Company loses control of a subsidiary, a gain or loss is recognized in profit or loss and is calculated as the difference between the aggregate of the fair value of consideration received and the fair value of any retained investment at the date when control is lost. The Company accounted for all amounts recognized in other comprehensive income in relation to the subsidiary on the same basis as would be required if the Company had directly disposed of the related assets and liabilities..

The unrealized profit or loss in downstream transactions between the Company and the subsidiaries shall be eliminated in the parent company only financial statements. When the Company transacts with its subsidiaries, profits and losses resulting from the transactions with the subsidiaries are recognized in the Company's parent company only financial statements only to the extent of interests in the subsidiaries that are not owned by the Company.

#### (VII) Investment in affiliated enterprises

An affiliated enterprise is an enterprise over which the Company has significant influence, but which is not a subsidiary or a joint venture.

Under the equity method, the investment is initially recognized at cost. The carrying amount of investment is adjusted thereafter for the post-acquisition changes in the Company's share of profit or loss and other comprehensive income and profit distribution of the subsidiaries. For changes in equity in affiliated companies, the Company's equity in affiliated companies and changes in joint ventures are recognized in proportion to the Company's shareholding.

The excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets and liabilities of an affiliate at the date of acquisition is recorded as goodwill, which is included in the carrying amount of the investment and is not amortized. The excess of the Company's share of the net fair value of the identifiable assets and liabilities of affiliated companies over the cost of acquisition is recognized in profit or loss for the period.

If the Company does not subscribe for new shares of an affiliate enterprise in proportion to its shareholding, resulting in a change in its shareholding and increase or decrease in the net equity of the investment, the increase or decrease is adjusted to capital reserves changes in the net equity of the affiliate enterprise recognized under the equity method and the investment accounted for under the equity method. However, if the ownership interest in an affiliate enterprise is reduced as a result of subscription or acquisition without proportionate shareholding, the amount recognized in other comprehensive income or loss related to the affiliate enterprise is reclassified in proportion to the reduction on the same basis as that required for the direct disposal of the related assets or liabilities of the affiliate enterprise. If the former adjustment is charged to capital reserve and the balance of capital reserve generated from the investment using the equity method is insufficient, the difference is charged to retained earnings. The Company ceases to recognize further losses when its share of losses of an affiliated enterprise equals or exceeds its interest in the affiliated enterprise (including the carrying amount of investments in affiliates under the equity method and other long-term interests that are in substance a component of the Company's net investment in the affiliated enterprises). The Company recognizes additional losses and liabilities only to the extent that legal obligations, constructive obligations or payments on behalf of affiliated enterprises have been incurred.

In assessing the impairment, the Company considers the overall carrying amount of the investment (including goodwill) as a single asset to compare the recoverable amount with the carrying amount for the purpose of impairment testing, and the recognized impairment loss is part of the carrying amount of the investment. Any reversal of impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

When the Consolidated Company ceases to adopt the equity method from the date it ceases to invest in the affiliated enterprise, its retained interest in the former affiliated enterprise is measured at fair value. And the difference between such fair value and the disposal price and the carrying amount of the investment on the date it ceases to adopt the equity method is recognized in profit or loss for the current period. In addition, the Company accounted for all amounts recognized in other comprehensive income in relation to the affiliated enterprise on the same basis as would be required if the affiliated enterprise had directly disposed of the related assets and liabilities.. If an investment in the affiliated enterprise becomes a joint venture or an investment in a joint venture becomes an investment in the affiliated enterprise, the Company continues to use the equity method without remeasuring the retained interest.

When the Company transacts with its subsidiaries, profits and losses resulting from the transactions with the subsidiaries are recognized in the Company's parent company only financial statements only to the extent of interests in the subsidiaries that are not owned by the Company.

#### (VIII) Property, plant, and equipment

Property, plant, and equipment shall be recognized at cost and subsequently at cost less accumulated depreciation and accumulated impairment losses.

No depreciation is provided for owned land.

The depreciation of property, plant, and equipment (including assets held under finance leases) in its useful life is made on a straight-line basis for each major part/component separately. Where the lease term is less than the useful life of an asset, the depreciation is recognized over the lease term. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

When property, plant, and equipment is derecognized, the difference between the net disposal proceeds and the carrying amount of the asset shall be recognized in profit or loss.

#### (IX) Investment property

Investment property is real estate held to earn rentals or for capital appreciation or both. Investment property also includes land held for future use that is currently undetermined.

Investment property is initially measured at cost (including transaction costs) and subsequently measured at cost less accumulated depreciation and accumulated impairment losses. The Company provides depreciation on a straight-line basis.

When investment property is derecognized, the difference between the net disposal proceeds and the carrying amount of the asset shall be recognized in profit or loss.

#### (X) Impairment of tangible and intangible assets (excluding goodwill)

On each balance sheet date, the Company reviews its property, plant, and equipment, rightof-use assets, and intangible assets, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. If it is not possible to determine the recoverable amount for an individual asset, the Company shall estimate the recoverable amount of the asset's cash-generating unit.

Intangible assets with indefinite useful lives and not yet available for use are tested for impairment at least annually and whenever there is an indication of impairment.

The recoverable amount is the fair value minus cost of sales or its value in use, whichever is higher. If the recoverable amount of individual asset or the cash-generating unit is lower than its carrying amount, the carrying amount of the asset or the cash-generating unit shall be reduced to the recoverable amount and the impairment loss shall be recognized in profit or loss.

When the impairment loss is subsequently reversed, the carrying amount of the asset or the cash-generating unit will be reduced to the extent of the recoverable amount prior to revision, provided the increased carrying amount does not exceed the carrying amount (minus amortization or depreciation) of the asset or the cash-generating unit not declared as impairment loss in the previous years. A reversal of an impairment loss is recognized immediately in profit or loss.

## (XI) Financial Instruments

1. Financial assets

Regular trading of financial assets shall be recognized and derecognized in accordance with trade date accounting.

#### (1) Types of measurement

The types of financial assets held by the Company are financial assets measured at fair value through profit or loss, financial assets measured at fair value through other comprehensive income and financial assets measured at amortized cost.

A. Financial assets measured at fair value through profit or loss

Financial asset measured at fair value through profit or loss include financial assets that are compulsively measured at fair value through profit or loss and those designated as measured at fair value through profit or loss. Financial assets that are compulsively measured at fair value through profit or loss include investments in equity instruments not designated by the Consolidated The Company measured at fair value through other comprehensive income or loss, and investments in debt instruments that do not qualify for classification as measured at amortized cost or measured at fair value through other comprehensive income or loss.

Financial assets are designated as measured at fair value through profit or loss on initial recognition if the designation eliminates or significantly reduces the measurement or recognition inconsistency.

Financial assets measured at fair value through profit or loss are measured at fair value, and any gain or loss arising from their remeasurement is recognized in profit or loss. Please refer to Note 6 (21) for the determination of fair value.

B. Investments in equity instruments measured at fair value through other comprehensive income or loss

On initial recognition, the Company has an irrevocable option to designate investments in equity instruments that are not held-for-trading and not acquired in a business merger with contingent consideration to be measured at fair value through other comprehensive income.

Investments in equity instruments measured at fair value through other comprehensive income are measured at fair value, with subsequent changes in fair value reported in other comprehensive income and accumulated in other equity. Upon disposal of investments, the accumulated profit and loss are transferred directly to retained earnings and are not reclassified to profit or loss.

Dividends from investments in equity instruments measured at fair value through other comprehensive income or loss are recognized in profit or loss when the Company's right to receive them is established, unless the dividend clearly represents a partial recovery of the cost of the investment. C. Financial assets at amortized cost

When the Company's investments in financial assets match the following two conditions simultaneously, they are classified as financial assets at amortized cost:

- a. Financial assets are under a business model whose purpose is to hold financial assets and collecting contractual cash flows; and
- b. The terms of the contract generate a cash flow on a specified date that is solely for the payment of interest on the principal and the amount of principal outstanding.

Subsequent to initial recognition, such financial assets (including cash and cash equivalents, accounts receivable, other receivables, refundable deposits and other financial assets) are measured at the amortized cost equal to the gross carrying amount as determined using the effective interest method less any impairment loss; any foreign exchange gain or loss arising therefrom is recognized in profit or loss.

Except for the following two circumstances, interest income is calculated at the value of effective interest rate times the gross carrying amount of financial assets:

- a. For purchased or originated credit-impaired financial assets, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial assets.
- b. For financial assets that are not purchased or originated credit-impaired but subsequently have become credit-impaired, interest income is calculated by applying the effective interest rate to the amortized cost balance of such financial assets.

Cash equivalents include time deposits within three months from the acquisition date and with high liquidity and relatively low price changes convertible to cash any time. They are used for meeting short-term cash commitments.

(2) Impairment of financial assets

The impairment loss of financial assets (including trade receivables) at amortized cost is measured by the Company on the balance sheet date based on the expected credit losses.

Allowances shall be appropriated for trade receivables for expected credit losses for the duration of their existence. A loss allowance for the 12-month expected credit losses is required for a financial asset if its credit risk has not increased significantly since initial recognition. A loss allowance for full lifetime expected credit losses is required for a financial asset if its credit risk has increased significantly since initial recognition. The expected credit loss is the weighted average credit loss determined by the risk of default. The 12-month expected credit losses represent the expected credit losses arising from the possible default of the financial instrument in the 12 months after the balance sheet date, and the expected credit losses during the lifetime represent the expected credit losses arising from all possible defaults of the financial instrument during the expected existence period.

Through the loss allowance account, the carrying amount of all financial assets is reduced for the impairment loss, except for the investment in debt instruments measured at FVTOCI for which the impairment loss is recognized in other comprehensive income and does not reduce the carrying amount.

(3) <u>Derecognition of financial assets</u>

The Company derecognizes financial assets when the contractual rights to the cash inflow from the asset expire or when the Company transfers the financial assets with substantially all the risks and rewards of ownership to other enterprises.

If the Consolidated Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and retains control over the asset, it continues to recognize the asset to the extent of its continuing involvement The Company asset and recognizes a related liability for the amount that may be required to be paid. If the Company retains substantially all the risks and rewards of ownership of the financial asset, it continues to recognize the asset and recognizes the price received as a collateralized loan.

When a financial asset is derecognized in its entirety, the difference between its carrying amount and the sum of the consideration received plus any cumulative gain or loss recognized in other comprehensive income is recognized in profit or loss.

If the transferred asset is part The Company larger financial asset and the transferred portion qualifies for overall derecognition, the Consolidated Company allocates the previous carrying amount of the larger financial asset to each portion based on the relative fair values of the continuously recognized portion and the derecognized portion at the date of transfer. The difference between the carrying amount allocated to the excluded component and the consideration received for the excluded component plus the sum of any cumulative gain or loss recognized in other comprehensive income or loss allocated to the excluded component is recognized in other comprehensive income or loss to each of these components based on the relative fair values of the continuously recognized component and the excluded component.

2. Equity Instruments

Debt and equity instruments issued by the Company classified as financial liabilities or equity based on the substance of the contractual agreements and the definitions of financial liabilities and equity instruments. Equity tools issued by the Company are recognized at the acquisition price less direct issue costs.

The Company's own equity instruments are recognized and derecognized under equity. The purchase, sale, issuance or cancellation the Company's own equity instruments is not recognized in profit or loss.

- 3. Financial liabilities
  - (1) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method, except for financial liabilities carried at fair value through profit or loss:

Financial liabilities measured at fair value through profit or loss include those held for trading and those designated as measured at fair value through profit or loss.

Financial liabilities held for trading are measured at fair value, and the gain or loss arising from their remeasurement includes any dividends or interest paid on the financial liabilities and is recognized in profit or loss.

The Company designates a financial liability as measured at fair value through profit or loss on initial recognition if:

- A. The designation eliminates or significantly reduces inconsistencies in measurement or recognition; or
- B. A group of financial assets, financial liabilities, or both, is managed and its performance is evaluated on a fair value basis in accordance with a written risk management or investment strategy, and information on this portfolio provided internally to management of the Company is also based on fair value.
- C. A hybrid (combined) contract containing one or more embedded derivatives is specified as a whole.

For financial liabilities designated as at fair value through profit or loss, the amount of change in fair value arising from changes in credit risk is recognized in other comprehensive income and is not subsequently reclassified to profit or loss, but only to retained earnings when the related financial liabilities are derecognized. The amount of the remaining fair value change of the liability is reported in profit or loss. If the recognition of changes in fair value attributable to credit risk in other comprehensive income would cause or aggravate an accounting mismatch, the entire fair value change of the liability is reported in profit or loss.

(2) Derecognition of financial liabilities

When financial liabilities are derecognized, the difference between their carrying amount and the paid consideration (including any transferred non-cash assets or liabilities assumed) shall be recognized in profit or loss.

#### (XII) <u>Revenue recognition</u>

Revenue from sales of merchandise is derived from sales of electronic component materials. Revenue is recognized when the merchandise is delivered to the customer and the customer obtains control over it. The Company recognizes a contract liability because it receives a portion of the consideration from the customer before transferring the merchandise, and the Company is obligated to transfer the merchandise subsequently.

#### (XIII) Leases

The Company assesses whether the contract is (or includes) a lease on the date of its establishment.

1. <u>The Company is the lessor</u>

A lease is classified as a finance lease when the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the asset to the lessee. All other leases are classified as operating leases.

When the Company subleases right-of-use assets, it uses the right-of-use assets (instead of the subject assets) to determine the classification of the subleases.

If a principal tenancy is a short-term lease to which the Company applies the recognition exemption, the sublease is classified as an operating lease.

Under operating leases, lease payments, net of lease incentives, are recognized as income on a straight-line basis over the term of the relevant lease. The original direct cost incurred in acquiring an operating lease is added to the carrying amount of the subject asset and recognized as an expense on a straight-line basis over the lease term.

2. If the Company is a lessee:

Except that the leases of low value assets and short-term leases applicable to the exemption are recognized as expenses on a straight-line basis over the lease term, other leases are recognized as right-of-use assets and lease liabilities on the lease commencement date.

The right-of-use assets shall be depreciated on a straight-line basis from lease commencement date to the end of the useful life or the end of the lease term using the original cost of the right-of-use asset (including the original measurement of the lease liability, lease payments made before the lease commencement date less lease incentives received, and the original direct cost of the right-of-use asset).

Lease liabilities were originally measured by the present value of lease payments. If the implicit interest rate of lease is easy to determine, the interest rate is used to discount the lease payment. If the interest rate is not easy to determine, the lessee's incremental borrowing rate shall be used. Subsequently, the lease liability is measured on the basis of amortized cost using the effective interest method, and the interest expense is apportioned during the lease period. In the case that future lease payments change as a result of a change in the lease term, the Company remeasures the lease liability and correspondingly adjusts the right-of-use asset, except in the case when the carrying amount of the right-of-use asset has reduced to zero, in which case any residual remeasured amount shall be recognized in profit or loss. Lease liabilities are expressed separately in the balance sheets.

The variable rent in the lease agreement that is not dependent on the index or rate is recognized as an expense in the period in which it occurs.

#### (XIV) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other than those stated above, all other borrowing costs are recognized in profit or loss in the period in which they are incurred.

#### (XV) Employee benefits

1. Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the services.

2. <u>Retirement benefits</u>

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

The costs of defined benefits under the defined benefit pension plan (including service cost, net interest, and the remeasurement amount) are calculated based on the projected unit credit method. The cost of services and the net interest of the net defined benefit liability (asset) are recognized as employee benefit expenses as they occur. The remeasurements (including actuarial gains and losses, changes in the effect of the asset ceiling, and the return on plan assets after interest deduction) are recognized as other comprehensive income and included as retained earnings at the time of occurrence, and are not reclassified to profit or loss in subsequent periods.

Net defined benefit liabilities (assets) are the deficit (balance) of the contribution made according to the defined benefit pension plan. A net defined benefit asset shall not exceed the present value of the contributions to be refunded from the plan, or the reductions in future contributions.

## 3. Other long-term employee benefits

Other long-term employee benefits are accounted for in the same manner as defined benefit pension plans, except that the related remeasurement is recognized in profit or loss.

## 4. Post-employment Benefits

The Company recognizes a liability for post-employment benefits when the offer of post-employment benefits can no longer be revoked or when the related restructuring costs are recognized, whichever is earlier.

#### (XVI) Income tax

Income tax expenses are the sum of the tax in the current year and deferred income tax.

1. <u>Current income tax</u>

A tax is levied on the unappropriated earnings pursuant to the Income Tax Act and is recorded as an income tax expense in the year when the shareholders' meeting resolves to appropriate the earnings. Adjustments to income tax payable from previous years are recognized in the income tax of current period.

2. Deferred income tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred income tax liabilities are generally recognized for all taxable temporary differences, and deferred income tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which deductible temporary differences and income tax deduction for expenses such as loss deduction can be utilized.

Deferred income tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and equities are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of the deferred income tax assets is re-examined at each balance sheet date and the carrying amount is reduced for assets that are no longer likely to generate sufficient taxable income to recover all or part of the assets. The carrying amount of items that were not previously recognized as a deferred tax asset is also reviewed at each balance sheet date and is raised when it becomes probable that sufficient taxable profit will be available in the future to recover all or part of the asset. Deferred income tax assets and liabilities are measured at the tax rate of the period of expected repayment of liabilities or realization of assets. The rate is based on the tax rate and tax laws that have been enacted prior to the balance sheet date or have been substantially legislated. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the balance sheet date, to recover or settle the carrying amount of its assets and liabilities.

## 3. Current and deferred income taxes for the period

Current income tax and deferred income tax are recognized in profit or loss, but the current and deferred income taxes associated with items recognized in other comprehensive profit or loss or directly included in equity are respectively recognized in other comprehensive profit or loss or directly included in equity.

## V. Primary Sources of Uncertainties in Material Accounting Judgments, Estimates, and Assumptions

When the Company adopts accounting policies, the management must make judgments, estimates, and assumptions based on historical experience and other critical factors for related information that are not readily available from other sources. Actual results may differ from these estimates.

The management will review the estimates and underlying assumptions on an ongoing basis. If an amendment of an estimate affects only the current period, it is recognized in the period in which it is amended. If an amendment of accounting estimates affects the current year and future periods, it shall be recognized in the period of amendment and future periods.

## (I) Estimated impairment of receivables

The allowance for losses on the Company's accounts receivable were estimated based on the assumptions of default risk and expected loss rate. At each reporting date, the Company considers historical experience, current market conditions and forward-looking estimates to determine the assumptions to be used in calculating the impairment and the input values to be selected.

## (II) Fair Value of Level 3 Financial Instruments

When the fair value of financial assets recognized in Level 3 on the balance sheet is not available in an active market, the fair value is determined primarily using market-based valuation techniques. The fair value assessment involves significant judgment, such as the selection of comparable companies or prices for equity transactions, and judgment on various assumptions, such as liquidity discounts and valuation multipliers. Changes in the assumptions used in this model will affect the fair value of the reported financial instruments.

## (III) Impairment of Inventories

The net realizable value of inventories is the estimated selling price in the ordinary course of business less the estimated cost of investment until completion and the estimated cost to complete the sale. These estimates are based on current market conditions and historical sales experience of similar products, and changes in market conditions may materially affect the results of these estimates.

#### VI. Details of Significant Accounts

#### (I) <u>Cash and Cash Equivalents</u>

Net amount

|                              | Decem | ber 31, 2022 | Decem | ber 31, 2021 |
|------------------------------|-------|--------------|-------|--------------|
| Cash on hand and change fund | \$    | 177          | \$    | 169          |
| Bank deposits                |       | 76,167       |       | 43,754       |
|                              | \$    | 76,344       | \$    | 43,923       |

The market rate interval of bank deposits on the balance sheet date is as follows:

|      | Bank deposits                                |    | ber 31, 2022 | -  | nber 31, 2021<br>3%~0.04%            |

| 1. | The Company grants credit for merchandise sales for a period of 30 to 120 days           |
|----|--|
|    | depending on the credit quality of the customer. The Company a simplified approach       |
|    | to estimate expected credit losses for receivables, which is measured using expected     |
|    | credit losses over the life of the receivables.For this measurement purpose, these kinds |
|    | of receivables are grouped by common credit risk characteristics that represent the      |
|    | customer's ability to pay all amounts due in accordance with contractual terms and are   |
|    | included in forward-looking information.   |

\$

\$

-

2. The Company's accounts receivable and collections are analyzed according to the credit period provided to customers as follows:

|   | Decer | nber 31, 2022 | Decen | nber 31, 2021 |
|---|-------|---------------|-------|---------------|
| Accounts that have not exceeded the credit period | \$    | 227,140       | \$    | 165,175       |
| Accounts that have exceeded the credit period     |       | 110,380       |       | 99,879        |
| Total   | \$    | 337,520       | \$    | 265,054       |

3. Receivables that are overdue at the balance sheet date but for which the Company has not recognized an allowance for loss are considered recoverable by the Company's management because the credit quality has not materially changed and the Company does not hold any collateral or other credit enhancement protection for these receivables. The Company adjusted the expected credit loss ratio for some customers in the year of 2020, because some customers are located in areas affected by the COVID 19 pandemic and the loss patterns of these customer groups differ from those of other customer groups.

The accounts receivable and collections are analyzed according to the credit period as follows:

|                   | December 31, 2022 |         | December 31, 202 |         |
|-------------------|-------------------|---------|------------------|---------|
| Less than 90 days | \$                | 217,109 | \$               | 149,035 |
| 91-120 days       |                   | 10,031  |                  | 16,140  |
| 121-150 days      |                   | -       |                  | -       |
| 151-180 days      |                   | -       |                  | -       |
| 181-365 days      |                   | -       |                  | -       |
| Over 365 days     |                   | 110,380 |                  | 99,879  |
| Total             | \$                | 337,520 | \$               | 265,054 |

The above is an aging analysis based on the account establishment date.

The aging analysis of receivables that were overdue but not impaired was as follows:

|                   | December 31, 2022 |   | December 31, 2 |   |
|-------------------|-------------------|---|----------------|---|
| Less than 90 days | \$                | - | \$             | - |
| 91-120 days       |                   | - |                | - |
| 121-150 days      |                   | - |                | - |
| 151-180 days      |                   | - |                | - |
| 181-365 days      |                   | - |                | - |
| Over 365 days     |                   | - |                | - |
| Total             | \$                | - | \$             | - |

The above is an aging analysis based on the account establishment date.

4. Bills receivable, accounts receivable, other receivables and collections changes in allowance for doubtful accounts of the Company in 2022 and 2021 are as follows:

|  | 2022 |         | 2021 |          |
|--|------|---------|------|----------|
| Beginning balance                            | \$   | 99,959  | \$   | 111,261  |
| Expected gain on (reversal of credit losses) |      | 10,471  |      | (11,302) |
| Ending balance                               | \$   | 110,430 | \$   | 99,959   |

5. The aging analysis of receivables that were impaired was as follows:

Accounts receivable and collections

| December 31, 2022 |         | December 31, 2021                   |  |
|-------------------|---------|-------------------------------------|--|
| \$                | -       | \$                                  | -                                      |
|                   | 10,031  |                                     | 16,140                                 |
|                   | -       |                                     | -                                      |
|                   | -       |                                     | -                                      |
|                   | -       |                                     | -                                      |
|                   | 110,380 |                                     | 99,879                                 |
| \$                | 120,411 | \$                                  | 116,019                                |
|                   |         | \$ -<br>10,031<br>-<br>-<br>110,380 | \$ - \$<br>10,031<br>-<br>-<br>110,380 |

The above aging analysis is based on the accounts receivable closing date and accounts receivable management policy.

(III) Inventories

|             | December 31, 2022 |         | December 31, 2021 |         |
|-------------|-------------------|---------|-------------------|---------|
| Commodities | \$                | 153,151 | \$                | 230,963 |

- 1. The cost of goods sold related to inventories was NT\$825,074 and NT\$644,425 thousand for 2022 and 2021, respectively.
- 2. The cost of goods sold for the years of 2022 and 2021 included a loss on decline in value of inventories of NT\$27,891 thousand and a gain on reversal of inventory decline of NT\$7,648 thousand, respectively. The benefit of the rebound in 2021 was due to the de-valuation of some of the inventories that had fallen in value.

#### (IV) Financial assets measured at fair value through profit or loss - Non-current

- 2. Please refer to Note 8 for the amount of collaterals provided by the Company as collaterals for loans.

#### (XIII) Post-retirement Benefit Plan

(XII)

- 1. Defined contribution plans
  - (1) The pension system applicable to the Company under the "Labor Pension Act" is a defined contribution plan under government administration, to which the Company contributes 6% of employees' monthly salary and wages to their personal accounts at the Bureau of Labor Insurance.
  - (2) For the years of 2022 and 2021, the Company recognized a total of NT\$1,086 thousand and NT\$949 thousand, respectively, The Company consolidated statements of income in accordance with the proportionate share of the defined contribution plan.

#### 2. Defined benefit plans

- (1) The Company's pension system under the "Labor Standards Act" is a defined benefit pension plan managed by the government. The payment of the employee's pension is based on the period of service and the average salary of 6 months before the approved retirement date. The Company contributes 2% of employees' monthly salaries to the pension fund, which is deposited in the name of the Supervisory Committee of Business Entities' Labor Retirement Reserve The Company at the Bank of Taiwan. If the estimated balance of the special account before the end of the year is not enough to pay for the workers who are expected to meet the retirement requirements in the following year, the difference will be withdrawn in one lump sum by the end of March of the following year. The special account is entrusted to the Bureau of Labor Funds, Ministry of Labor. The Company has no right to influence the investment management strategy.
- (2) The amounts included in the parent balance sheet for defined benefit plans are shown below

|                                  | Decem | ber 31, 2022 | Decem | ber 31, 2021 |

| Employer contributions and payment  | (  | 10,032) | (   | 110)                | (                               | 10,142) |
| December 31, 2022   | \$   | 19,778  | \$( | 7,009)              | \$                              | 12,769  |

The amounts recognized in profit or loss for defined benefit plans are summarized by function as follows:

|                                     | 2022      | <br>2021  |
|-------------------------------------|-----------|-----------|
| Selling expenses                    | \$<br>610 | \$<br>670 |
| General and administrative expenses | <br>170   | 61        |
|                                     | \$<br>780 | \$<br>731 |

- (4) The Company is exposed to the following risks as a result of the pension system of the "Labor Standards Act":
  - A. Investment risk: The Bureau of Labor Funds, Ministry of Labor invests the Labor Pension Fund in domestic and foreign equity securities, debt securities and bank deposits through its own use and entrusted operation. The amount allocated to the Company's plan assets is based on the income at an interest rate no less than the local bank's two-year time deposit rate.
  - B. Interest rate risk: A decrease in interest rates will increase the present value of the defined benefit obligation, but the investment return on plan assets will also increase, which will have a partially offsetting effect on the net defined benefit obligation.

- C. Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salary of the plan member. As a result, increases in plan members' salaries will increase the present value of the defined benefit obligation.
- (5) The present value of the Company's planned assets and defined benefit obligations are determined by a qualified actuary. The key assumptions of the actuarial valuation as of the measurement date are presented below:

|                                  | December 31, 2022  | December 31, 2021  |
|----------------------------------|--|--|
| Discount rate                    | 1.20%  | 0.60%  |
| Expected rate of salary increase | 2.75%  | 2.75%  |
| Mortality rate                   | The parent company<br>adopted the 6th<br>experience life table | The parent company<br>adopted the 6th<br>experience life table |
|                                  | of Taiwan life<br>insurance industry                           | of Taiwan life<br>insurance industry                           |

(6) The amount by which the present value of the defined benefit obligation would increase (decrease) if there were reasonably possible changes in significant actuarial assumptions, respectively, with all other assumptions held constant, is as follows:

|                                  | Decembe | er 31, 2022 | December 31, 2021 |      |
|----------------------------------|---------|-------------|-------------------|------|
| Discount rate                    |         |             |                   |      |
| Increase by 0.25%                | \$(     | 244)        | \$(               | 397) |
| Decrease by 0.25%                | \$      | 249         | \$                | 405  |
| Expected rate of salary increase |         |             |                   |      |
| Increase by 0.25%                | \$      | 196         | \$                | 321  |
| Decrease by 0.25%                | \$(     | 194)        | \$(               | 317) |

The sensitivity analysis above may not reflect actual changes in the present value of the defined benefit obligation as the actuarial assumptions may be correlated with each other and changes in only one assumption are not probable.

(7) The amounts expected to be contributed in the coming year are as follows:

|   | Decemb | per 31, 2022 | December 31, 2021 |       |  |
|---|--------|--------------|-------------------|-------|--|
| Amount expected to be withdrawn within 1 year | \$     | 70           | \$                | 121   |  |
| Average period of defined benefit obligation  | 5      | years        | 5                 | years |  |

- (1) If the Company has a net profit for the current year, it shall first use the profit to pay income taxes and make up for any accumulated losses, and then set aside 10% as a legal capital reserve. Any excessive balance may be reserved or transferred to be a special reserve pursuant to relevant laws. Any remaining balance in retained earnings may be appropriated for dividends in accordance with a proposal for appropriation of earnings as approved by the Board of Directors and submit it to the shareholders' meeting for distribution of shareholder dividends.
- (2) The Company shall set aside a legal reserve until it equals the Company's paid-in capital. The legal reserve may be used to make up for losses. When the Company has no loss, the portion of the legal reserve exceeding 25% of the total paid-in capital may be appropriated in the form of cash, in addition to being transferred to share capital.
- (3) The shareholders' meetings approved the distribution of earnings for years 2021 and 2020 on May 31, 2022 and August 18, 2021, respectively, as follows:

|                 | Surplus distribution case |           |    |     | Dividends Per Share (NT\$) |    |    |     |
|-----------------|---------------------------|-----------|----|-----|----------------------------|----|----|-----|
|                 | 20                        | 2021 2020 |    | 020 | 202                        | 21 | 20 | 020 |
| Legal reserve   | \$                        | -         | \$ | -   |                            |    |    |     |
| Special reserve |                           | -         |    | -   |                            |    |    |     |
| Cash dividends  |                           | -         |    | -   | \$                         | -  | \$ | -   |
| Stock dividends |                           | -         |    | -   |                            | -  |    | -   |

(4) The Company has provided for and reversed the special reserve in accordance with the provisions of JinGuanZhengFaZi Letter No. 1090150022.

#### 4. Other equity items

(1) Financial statements translation differences of foreign operations

|                                   |     | 2022   |     | 2021   |
|-----------------------------------|-----|--------|-----|--------|
| Beginning balance                 | \$( | 5,627) | \$( | 3,958) |
| Financial statements translation  |     |        |     |        |
| differences of foreign operations |     | 6,740  | (   | 2,086) |
| Related income tax                | (   | 1,347) |     | 417    |
| Ending balance                    | \$( | 234)   | \$( | 5,627) |

(2) Unrealized valuation gains or losses on financial assets measured at fair value through other comprehensive profit or loss

|                               | <br>2022       | 2021 |  |   |
|-------------------------------|----------------|------|--|---|
| Beginning balance             | \$<br>-        | \$   |  | - |
| Unrealized gains or losses on |                |      |  |   |
| investments in equity         |                |      |  |   |
| instruments measured at fair  |                |      |  |   |
| value                         | (22,839)       |      |  | - |
| through other comprehensive   |                |      |  |   |
| income                        |                |      |  |   |
| Ending balance                | \$<br>(22,839) | \$   |  | - |

Investments in equity instruments measured at fair value through other comprehensive income are measured at fair value, with subsequent changes in fair value reported other comprehensive income and accumulated in other equity. Upon disposal of investments, the accumulated profit and loss are transferred directly to retained earnings and are not reclassified to profit or loss.

1. In accordance with the provisions of the Articles of Association the Company sets aside employee compensation and remuneration for directors and supervisors at a rate of not less than 5%-10% and not more than 2% on the pre-tax benefits before deduction of the distribution of employee compensation and compensation to directors and supervisors for the current year. However, if the Company still has accumulated losses, the Company should first make up for them.

2. The remuneration of employees and remuneration of directors and supervisors for the years of 2022, as approved by the Board of Directors, are as follows:

|                                 |    | 2021 |    |       |    | 2020 |    |     |  |

| supervisors                     |    | -    |    | -     |    | -    |    | -   |  |

- 3. The amount of compensation to employees and directors and supervisors resolved by the board of directors is not materially different from the amount recognized in the financial statements for the years of 2022 and 2021. If there is any change in the amount after the annual financial statements are approved and issued, it will be adjusted and recorded in the following year in accordance with the changes in accounting estimates.
- 4. For information on the Company's employee compensation and remuneration for directors and supervisors, please visit the "Market Observation Post System".

## (XVIII) Income tax

1. Income tax recognized in profit or loss

|   | 2022 |       | 2021 |  |   |
|---|------|-------|------|--|---|
| Current income tax                              |      |       |      |  |   |
| Current year generators                         | \$   | 5,730 | \$   |  | - |
| Deferred income tax                             |      |       |      |  |   |
| Temporary difference generation                 |      |       |      |  |   |
| and reversal                                    |      | -     |      |  | - |
| Income tax expense recognized in profit or loss | \$   | 5,730 | \$   |  | - |

A reconciliation of the accounting income and income tax expense to the applicable tax rate is as follows:

|   | 2022 |          | 2021 |          |
|---|------|----------|------|----------|
| Net income (loss) before income                 |      |          |      |          |

# 6. <u>Income tax assessment</u>

The Company's income tax returns have been approved by the tax authorities up to 2020 and no significant tax administrative relief has been provided.

#### (XIX) Earnings per Share

|                            | Unit: In Shares or I |      |      |       |
|----------------------------|----------------------|------|------|-------|
|                            | 2022                 |      | 2021 |       |
| Basic earnings per share   | \$                   | 0.83 | \$(  | 0.83) |
| Diluted earnings per share | \$                   | 0.83 | \$(  | 0.83) |

Net income and weighted average number of common shares used for calculation of earnings per share are as follows:

1. Net profit for the period

|    |  |    | 2022   |           | 2021          |
|----|--|----|--------|-----------|---------------|
|    | Net profit used to calculate basic and<br>earnings per share<br>Effect of potentially dilutive common<br>shares: |    | 57,406 | \$(       | 57,571)       |
|    | After-tax interest on convertible<br>corporate bonds<br>Net profit used to calculate diluted                     |    | -      | <u> </u>  | -             |
|    | earnings per share   | \$ | 57,406 | \$(       | 57,571)       |
| 2. | Number of Shares   |    |        |           |               |
|    |  |    |        | Unit: The | ousand shares |
|    |  |    | 2022   |           | 2021          |
|    | Weighted average number of common<br>shares used for calculation of basic<br>earnings per share                  |    | 69,514 |           | 69,514        |
|    | Effect of potentially dilutive common shares: None   |    | -      |           | -             |
|    | Weighted average number of common<br>shares used for calculation of diluted<br>earnings per share                |    | 69,514 |           | 69,514        |

#### (XX) Capital Risk Management

The purpose of the Company The Company capital management policy is to ensure the Company's ability to continue as a going concern in order to maximize shareholder compensation. To ensure that the above objectives are met, the management of the Company regularly reviews its capital structure, taking into account the general economic conditions, prevailing interest rates and the adequacy of cash flows from operating activities, and adjusts the capital structure by paying dividends, issuing new shares, repurchasing shares, and issuing or redeeming bonds.

The Company is not subject to any other external capital requirements.

#### (XXI) Financial Instruments

| 1. <u>Category of financial instruments</u>   |                   |                   |
|---|-------------------|-------------------|
| Financial assets  | December 31, 2022 | December 31, 2021 |

| Accounts payable  | 22,462            | 2,351             |
| Other payables  | 12,736            | 6,412             |
| Other payables - Related parties  | 1,531             | -                 |
| Lease liabilities - Current   | 2,931             | -                 |
| Long-term loans due within one year or one business cycle   | 7,044             | 13,332            |
| Long-term loans   | 2,716             | 9,750             |
| Lease liabilities - Non-current   | 31,548            | -                 |

## 2. <u>Financial risk management objectives and policies</u>

The Company major financial instruments include cash and cash equivalents, notes and accounts receivable, notes and accounts payable, corporate bonds payable, and long-term and short-term borrowings. The financial management department of the Company provides services for the business units, coordinates the operation of the domestic financial market, and supervises and manages financial risks related to the operation of the Company by analyzing the internal risk reports of the risks according to the level and scope of risks. Such risks include market risk (exchange rate risk and interest rate risk), credit risk, and liquidity risk.

The Company does not engage in transactions of financial instruments (including derivative financial instruments) for speculative purposes. The Financial Department reports to the Board of Directors of the Company on a quarterly basis.

(1) Market risk

A. Foreign exchange risk

The operations of the Company and net investment in foreign operations are mainly conducted in foreign currencies. Therefore, the exchange rate risk arises.

The Company's foreign currency receivables and payables are partly in the same currency, and a natural hedge effect is generated for a substantial portion of the site. The Company regularly reviews the net position of assets and liabilities in each currency and manages the risk of the net position. Currently the Company's foreign currency receivables and payables are not exposed to significant exchange rate changes due to the short maturity of each transaction.

The Company engages in business involving certain non-functional currencies and is therefore subject to exchange rate fluctuations. Information on foreign currency assets and liabilities that are subject to significant exchange rate fluctuations is as follows:

#### B. Interest rate risk

The Company's short-term borrowings bear floating interest rates, resulting in interest rate risk. The carrying amounts of financial assets and financial liabilities of the Company exposed to interest rate risk on the balance sheet date are as follows:

|                                | December 31, 2022 |         | December 31, 202 |         |
|--------------------------------|-------------------|---------|------------------|---------|
| Cash flow interest rate risk - |                   |         |                  |         |
| financial liabilities          | \$                | 200,880 | \$               | 391,905 |

#### Sensitivity analysis

The sensitivity analysis below is prepared based on the risk exposure of nonderivative instruments to the interest rates at balance sheet date. For variable-rate liabilities, the analysis is based on the weighted-average amount over the reporting period. The rate of change used when reporting interest rates within the Company to the main management is an increase of 1% in interest rates, which also represents the management's assessment of the reasonably possible range of changes in interest rates.

If interest rates increase by 1%, and all other variables remain unchanged, the Company's net profit before tax will decrease by NT\$3,694 thousand and NT\$3,624 thousand for 2022 and 2021, respectively.

The Company's sensitivity to interest rates increased in the current period compared to the previous period mainly due to the increase in the weighted average amount of variable-rate debt instruments.

(2) Credit risk

Credit risk refers to risk that causes the financial loss of the Company due to a counterparty's delay in performing contractual obligations. As of the balance sheet date, the Company's largest credit risk exposure from a counterparty's failure to fulfill obligations came from the carrying amount of financial assets recognized in the balance sheets.

The main potential credit risk of the Company arises from financial instruments with accounts receivable. The Company's sales to more than 10% of its customers accounted for 94% and 95% of its operating revenues for the years of 2022 and 2021, respectively, and their accounts receivable balances were approximately 43% and 62% as of December 31, 2022 and 2021, respectively. To reduce credit risk, the Company periodically and continuously evaluates the financial position of its customers and the collectibility of their receivables, and provides an allowance for doubtful accounts.

#### (3) Liquidity risk

The Company manages and maintains sufficient cash to support operations and reduce the impact of cash flow fluctuations. The management of the Company supervises the use of the credit line and ensures compliance with the terms of the loan contracts.

Bank loans are an important source of liquidity for the Company. As of December 31, 2022 and 2021, the Company had unused banking facilities of NT\$35,540 and NT\$108,695 thousand, respectively.

#### Liquidity Risk and Interest Rate Risk Table

The remaining contractual maturity analysis of non-derivative financial liabilities is based on the earliest possible repayment date of the Company and is compiled based on the undiscounted cash flows of financial liabilities (including principal and estimated interest).

Specifically, the Company's bank borrowings with repayment on demand clause are included in the earliest time band regardless of the probability of the banks choosing to exercise their rights immediately. The analysis of maturity dates for other nonderivative financial liabilities is based on the agreed repayment dates

Note 1: If the terms of the related party transaction are different from the normal terms of the transaction, the differences and the reasons for the differences should be described in the unit price and credit period columns.

Note 2: If there is any prepayment, the reason, contract terms, amount and difference from the general transaction type should be stated in the Remarks column.

Note 3: Paid-in capital represents the parent company's paid-in capital. If the issuer's stock has no par value or the par value per share is not NT\$10, the transaction amount of 20% of the paid-in capital is calculated based on 10% of the equity attributable to the owners of the parent company in the balance sheet.

#### Table 4:

Note 1: Investment methods can be divided into the following four types, which can be marked by categories:

(1) Direct investment in the mainland of China.

(2) Reinvestment in the mainland of China through a third party company (please specify the third party company).

(3) Other methods.

Note 2: Investment Profit (Loss) Recognized for the Period:

(1) If the investment is under preparation and there is no investment gain or loss, it should be specified.

(2) Investment income or loss is recognized on the following three bases, which should be specified

A. The financial statements have been audited by an international accounting firm with which the R.O.C. has a cooperative relationship.

B. The financial statements have been audited by a certified public accountant of the parent company in Taiwan.

C. Others.

Table 6:

#### Chip Hope Co., Ltd. Information on Major Shareholders December 31, 2022

| Shareholding               |                       |                    |
|----------------------------|-----------------------|--------------------|
| Name of Major Shareholders | Number of shares held | Shareholding Ratio |
| Cheng, Yuan-Ching          | 3,784,483             | 5.44 %             |

Note 1: This table is based on the last business day at the end of each quarter, and the information of shareholders holding 5% or greater of the ordinary and preference shares that have completed delivery without physical registration (including treasury shares) at the end of each quarter. Share capital indicated in the Company's parent company only financial statements may differ from the actual number of shares that have been issued and delivered without physical registration as a result of different basis of preparation.

Note 2: If a shareholder delivers its shareholding information to the trust, the aforesaid information shall be disclosed by the individual trustee who opened the trust account. For information on shareholders, who declare to be insiders holding more than 10% of shares in accordance with the Securities and Exchange Act, and their shareholdings including their shareholdings plus their delivery of trust and shares with the right to make decisions on trust property, please refer to MOPS.

# I. Financial Position

1. Increase in property, plant and equipment: mainly due to the increase of operating sites, decoration, and facilities.

 Decrease in other assets: mainly due to the increase in property, plant and equipment transferred from decoration and facilities.

3. Decrease in Current liabilities: mainly due to the repayment of short-term loans.

4. Increase in retained earnings: mainly due to the increase of pre-tax net profit in 2022.

5. Decrease in other equity interest: mainly due to the evaluation impairment of evaluation equity held.

# II. Financial Performance

Unit: NT\$ 1,000

| Year  | 2022      | 2021     | Increase<br>(Decrease)<br>Amount | Variable<br>Ratio (%) |
|---|-----------|----------|----------------------------------|-----------------------|
| Net operating revenue                       | 1,159,106 | 851,873  | 307,233                          | 36.07                 |
| Gross profit                                | 184,055   | 90,750   | 93,305                           | 102.82                |
| Operating expenses                          | 288,572   | 155,178  | (133,394)                        | (85.96)               |
| Non-operating income and expenses           | 165,532   | 29       | 165,503                          | 5,707.00              |
| Net profit for the year                     | 53,555    | (64,517) | 118,072                          | 183.01                |
| Other comprehensive income (net, after tax) | (15,650)  | ( 369)   | (15,281)                         | 4,141.19              |

Major causes and effects of major changes in net income before tax items: With the relief of the global chip shortage in 2022, the amount of products shipped to customers gradually grew, resulting in an increase in the operating revenue of 2022 compared to the previous year. In addition, the gross profit of medical products is also high, resulting in a substantial increase in various operating figures compared to the previous year.

# III. Cash Flow

(I) Cash Flow Analysis for the Latest Fiscal Year

| Cash<br>Balance,<br>Beginning<br>of Year | Annual Net Cash<br>Outflow from<br>Operating<br>Activities | Annual Net Cash<br>Outflow from<br>Investment<br>Activities | Annual Net Cash<br>Inflow from<br>Financing<br>Activities | Impact of<br>Annual<br>Foreign<br>Exchange<br>Rate<br>Changes | Cash<br>Balance,<br>End of Year |
|--|--|---|---|---|---------------------------------|
| 99,058                                   | 35,231   | 143,924   | (183,828)   | 5,555   | 99,940                          |

Net cash inflows from operating activities: due to the increase of shipments to customers, resulting in an increase in amount collected from sales.

Net cash inflows from investing activities: due to the selling of the real estate and plants. Net cash outflows from financing activities: due to the repayment of loans.

# (II) Cash Flow Analysis for the Coming Year

#### Unit: NT\$ 1,000

|  |                                   |                                       |  |  | ,                 |  |  |  |  |
|--|-----------------------------------|---------------------------------------|--|--|-------------------|--|--|--|--|

- VI. Risk Analysis and Assessment for the Most Recent Fiscal Year and as of the Date of Publication of the Annual Report
  - 1. Effects of Changes in Interest Rates, Foreign Exchange Rates and Inflation on Corporate Finance, and Future Response Measures

The impact of interest rate and exchange rate on the Company's profit and loss

| Item                                    | 2022      |
|---|-----------|
| Net operating revenue (NT\$ 1,000)      | 1,159,106 |
| Interest expense (NT\$ 1,000)           | 16,256    |
| Interest expense/Net operating revenue  | 1.40%     |
| Exchange Interest (NT\$ 1,000)          | 12,132    |
| Exchange interest/Net operating revenue | 1.05%     |

The Company's interest rate risk is to borrow money from banks to meet the operation needs. The Company adjusts the loan amount with the change of interest rate and obtains favorable interest rates from banks. In the future, the interest rate will change according to the global economic boom.

As for the exchange rate, the Company's main exchange risk is the trend of the New

Taiwan Dollar against the US dollar. To curb soaring inflation in 2022, the US Federal Reserve has raised interest rates four times. It is expected to gradually slow down after raising interest rates again in the first half of 2023. The Taiwan Dollar is expected to recover, but the space is limited, and investment from domestic and foreign manufacturers is required to return to a strong pattern. To avoid the significant impact of exchange rate fluctuations, the Company opened foreign currency deposit accounts to maintain an appropriate position to mitigate the impact of exchange rate fluctuations.

In 2022, the Ukraine-Russia War, the rise of international crude oil and fertilizer prices, and the increase of demand for services for the gradual lifting of pandemic control, bringing consumer inflation to its highest level in recent years. However, inflation will eventually stabilize as supply chains absorb or pass on costs. Moreover, inflation items are mostly daily supplies and have a limited impact on company products.

2. The Company's Policy Regarding High-Risk Investments, Highly Leveraged Investments, Loans to Other Parties, Endorsements, Guarantees, and Derivatives Transactions; The Main Reasons for the Profits/Losses Generated Thereby; And Response Measures to Be Taken in the Future:

The Company Adopts A Prudent and Conservative Financial Policy and Does Not Engage in High-risk and Highly-leveraged Investments, Borrow Loans to Other Parties, Provide Endorsements, and Derivatives Transactions.

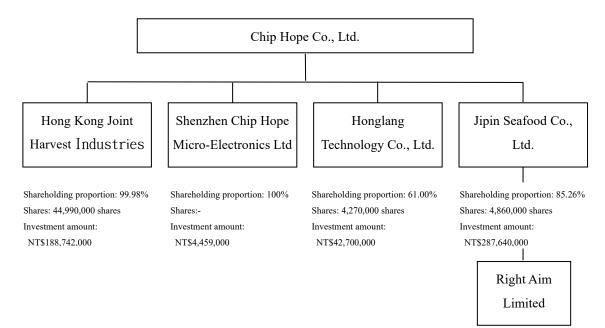

- 3. Research and Development Work to Be Carried Out in the Future, and Further Expenditures Expected for Research and Development Work:
  - The Company will continue to develop the following products:
     A. Smart IC software for medical products.
     B. AI speech recognition.
  - (2) The Company is expected to invest NT\$ 20 million in research and development.
- 4. Effects of and Response to Changes in Policies and Regulations At Home and Abroad Relating to Corporate Finance and Sales: None.
- 5. Effects of and Response to Changes in Technology and the Industry Relating to Corporate Finance and Sales: The Company began to act as the agency of E-Lan's IC products in 1994, and then acted as the mobile phone and its peripheral products. Due to the fierce price competition of electronic products and low gross profit, both the Company's pre-tax net profit and working capital showed negative growth. To improve its net profit, the Company began to invest in the leisure and tourism industry in 2015, which made a significant contribution to the Company's profit. In 2021, it began to produce hearing aids, which is conducive to the Company's operating revenue.
- 6. The Impact of Changes in Corporate Image on Corporate Risk Management, and the Company's Response Measures: None.
- 7. Expected Benefits from, Risks Relating to and Response to Merger and Acquisition Plans: None.
- 8. Expected Benefits from, Risks Relating to and Response to Factory Expansion Plans: None.
- 9. Risks Associated With Any Consolidation of Sales or Purchasing Operations, and

Mitigation Measures Being or to Be Taken:

- (1) Procurement: In the aspect of the Company's memory products, there were 3 suppliers with a purchase ratio of over 10% in 2022, indicating that there was no risk of centralized purchase.
- (2) Sales: In 2022, there were 5 customers accounting for over 10% of the sales, indicating no risk of sales concentration.
- 10. Effects of, Risks Relating to and Response to Large Share Transfers or Changes in Shareholdings by Directors, Supervisors, or Shareholders with Shareholdings of over 10%: The shareholding of directors and major shareholders is concentrated, and it reports the shareholding situation of the Board of Directors and shareholders with a shareholding of over 10% on time in accordance with the provisions of the Securities and Exchange Act, so there is no risk.
- 11. Effects of, Risks Relating to and Response to the Changes in Management Rights: None.
- 12. Litigation and Non-litigation Matters
  - (1) Disclosure of issues in dispute, the monetary amount of claims, filing date, counterparties, and status of any litigation or other legal proceedings in the most recent fiscal year and as of the publication date of the public prospectus where the Company is involved in pending litigation, legal proceedings or administrative proceedings, or a final judgment or ruling which may have a material adverse effect on the shareholders' equity or price of securities: None.
  - (2) Disclosure of issues in dispute, the monetary amount of claims, filing date, counterparties, and status of any litigation or other legal proceedings in the most recent fiscal year and as of the publication date of the public prospectus where the Company and/or any of its directors, supervisors, General Manager, de facto person in charge, shareholders with 10% or more share ownership, or affiliated companies are involved in pending litigation, legal proceedings or administrative proceedings, or a final judgment or ruling which may have a material adverse effect on the shareholders' equity or price of securities: None.
- 13. Other Important Risks and Mitigation Measures: None.
- VII. Other Important Matters: None.
